# BELCHING SMOKE — This ancient stationary gas engine coughed into life for the first time in years, yesterday, It belonged to Albert Duggins, a black-smith from Ivanhoe, until 1951, when Mr. Duggins died. John Craig, of Belleville, smith from Ivanhoe, until 1951, when Mr. Duggins died, John Craig, of Bellevilla, Mr. Duggins' son-inlaw, dug it up from a farm junk pile during the past week. Mr. Craig cleaned the motor, gound the valves and freed the rings, added a carburator from 1948 dear, and started it up again. Now the engine will go back to work — power for a farm workshop owned by G. Frederick, of Hollows, Mr. Craig thinks the motor is an International, vintage about 1918, it turns out about three horsepower at about 350 rpm, and is cooled by water poured into a basin about the cylinder. The water cools the engine by boiling away.

#### No Cause for Rejoicing NO CAUSE for Rejoicing An Ottawa report states that "the unemployment insurance fund has started to swingl back towards solvency following the heavy fand of a deficit-ridden winter and spring." This is good news. But it is nowhere near as good as the story, perhaps unintentionally, implies,

A spokesman for the Unemployment Insurance Commission is quoted as predicting "that the fund will be in the black again within a

th or so."

We have no doubt that it will. It ought to be added, however, that there is every reason to believe the fund will swing back into the red

to believe the rund will swing once mits the lead again a few months later.

Moreover, unless something is done either to increase contributions to the fund or to reduce claims on it, the only foreseeable change in a pattern of alternation between black ink in sumd red ink in winter is a permanent plunge into the red.

A quick glance at the figures will confirm this estimate. \_In-Tune contributions exceeded disbursements by twelve million dollars. At one this estimate. \_In-Tune contributions exceeded disbursements by twelve million dollars. At one time in 1956, there was \$300,000,000 in the fund. Even if it were possible to maintain June's record the year around, it would be the summer of 2,038 before the amount in the fund would be restored to the property of the pr

keep the fund in the black as long as the unemployment rate remains about the same. The only possible alternative to operating in the red is to reduce benefits. Something much red is to reduce benefits, and the fund and the fund to the fund the fund to the fund of paying, supplementary benefits, which ought not to be its responsibility. But this slone will not provide a solution. Sooner or later the government must tackle the problem of the conflicting high rate of unemployment. Any fund of paying the supplementation is the fund exceeded disturrant contributions to the fund exceeded disturrant payer and the fund exceeded and the fund exceeded disturrant payer and the fund exceeded and t time month is completely unwarra

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor Baseball players in most cases are like old dogs-can't teach 'em new tricks, but neither do they tet the majority of the old ones.

The Oldtimers' game here the other night brought back of of pleasant memories of junior and senior days when boys were pitching woo after baseball hours.

Somebody estimated that over the years since 1946 beneficient Nature had distributed approximately a and a half of lard among these former Batas and ranis junious.

A lot of these ancient beschall "Forda" lugged spare tires in the vicinity of the midriff. There was a lot of hreath-holding and, wheeting in the dressing room of the-dreyfeards as they shoe-horned themselves into uniforms that have been moth-balled for lo, these

About the only things that didn't need a street the spikes and the flat-topped caps they work my days of their baseball youth.

Art Wright after buckling his belt below his "em-bonpoint" tossed away three baseball shirts that refused the three-way stretch. He pulled on what looked like a white poncho and let the tall hang outside like a maternity blouse.

An hour or so later when Art ambled his way to mound to do his two-innings stint, some wag quipped, ere's the first pitcher I ever saw who wore a belly-

The over-the-years Knife and Fork Leagues haven't one much to inflate Bobby Bunton. Bobby looked swelle as he did in the junior and Beta days. Johnny owat, the third of the greybeard hurling triumwirsts, has deergone overall inflation but not enough to warrant' a ceial chair.

But from their performances on the mound, on the years mean manocurves of this husky i done little to effect their pliching arms.

True, probably not of them would be able to go r a nine-innings route, but their brief appearance at game indicated their throwing arms have benefited by ir plate-to-mouth calisthenics.

After all five hits over six and a half innings not such a had performance against such batting erages owned by the Kenmors. Wright retired aft in in a row during two of his hanker, while Mowat ruck out three and allowed a double in the frame in tich he totleft.

Mack "Red" Carson ambled out to left field hoping any fly balls would fall in his pocket. He lugged about 30 pounds of excess Carson baggage to first after he drew a walk at the plate.

It was a great show and one that could bear repeating before the ancient and honorables retire to the Ole rock-ing chair, crutches, or Homes for the Aged. There was a good turnout of fans and the proceeds netted the Ken-mors a much-needed \$200.

And there was a lot of dressing room reminiscing after the game was over and the ancients heaved sight of relief like a bery of houry dawagers after shedding their girdles.

A bit lonely perhaps was the silver-haired "Sonny" Green, the only representative there of the grand old central londerio Baseball League of the 19%, 20%, and 30%. At that Sonny had two sons, Vern and Bud, who are 1946 oldtimers themselves.

"Oldimers, my eye," anorted Sonny. "Why these grepheards are nothing more than a nunch of kids II I had Pecar, the Indian, the Billis brobers, Walt Gerow, All Meagher, Vern Weir, Speedy, Utronkl and some of the real elddimers hare, we'd whip the peats off these whippersnappers."

But surely a man has a right — or ought to have a right — to take himself away from the crowd, select a secluded spot and there, on his own property and interfering with no one, live as simply and as frugally as he likes.

If some planners had their way, the only Do We Have alternative they would allow a poor man to life in a rented room in a city slum would be a cell in the county jail.

in the county jail.

To them, there is no place like home — providing it has electric lights, running water and as least bedroom, kitchen, beth and mortgage.

An Englishman's home is said to be his casta. What we need is some legislation defining the minimum lot area for castles in Canada. Chate's has a law requiring sillinearies to be 440 chate's has a law requiring sillinearies to be 440 yards back from a highway. What is good enough for biliboards ought to be good enough for a shack which is in any way a menace to public health. Shacks 440 yards away from any property, public or private, whose owner objected to such a poor man's castle ought to be out of bounds for planners. Such a regulation would automatically keep shacks out of areas where land values are high and where their n would depress the values of surrounding proper-ties. And it would relieve a lot of municipal councillors and officials for other duties besides pestering the poverty-stricken.

money beats. If he is able to do it, he should get by all right — three times he has announced he would make it rain, and three times it rained. Nearly a year ago, in the middle of the drought, the phantom telephoned a newspaper and announced he would provide rain for the next day. Next day, Tulas received a half-inch other rain or Tulas and the rained day. The promised another rain or Tulas and the rained day. other rain for Tulsa, but the rain missed the other rain for Tules, but the rain missed the city, droped several inches on the suburst. Ap-parently insulted, the phantom phoned back and said he would try again. Three inches of rain fell on the city. Last weekend, he predicted a heavy rain when the burseau predicted light showers. Nine inches of rain, aimost a flood, fell on the city before the phantom called the rain particles of the city of the control of the lawspaper again to say he would turn it off. lawspaper again to say he would turn it off.

The rainmaker is either what he says he is. or a fake. In either case, one predicts, now he has revealed himself, the U.S. C.I.A. will be speaking to him before long. The rainmaking tech-nique he has been using, if he is really responsible for the results he claims, could be the most powerful military weapon in the world. If it works as he claims, there is little chance of his being allowed to retain control of it.

being answed to retain control of it.

The danger, however, is that if the system works, it will be classified "secret" by the U.S. government, and held out of sight for use only in case of war. This would be a great misfortune. If the techniques work as the mystery-man says If the techniques work as the mystery-man eage, they do, there is justification for assumption of control by the military. But if the military does gain control of any such techniques, there would be no justification in limiting their use to time of war. Such techniques, used for peace, could prevent war.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor The sun shone down warmly on the versadah of the miry Club that hot afternoon. It was one of the days en the mercury hit a high of ninety with the humidity samed to rise another point because of saturation.

The hest were had taken any desire to chase the little white ball ever green and fairway from those who came to play and remained to scotf the heat. It was too hundl to think—at least I thought so until I talked with an attractive young matron who had some very fixed ideas of her own.

Someone mentioned that fact—and that brought up the subject of dress at a country club.

unject at areas at a country club.

I happen to be one of those types which Nature endowed with a physicon that is definitely not adapted to the wearing of a bithin. If I dured attempt such a break more I would immediately be surrounded by men in white jackets, or approached by a circus presenter with a centract to become a headliner in the "Preak's.

I was properly attired in slacks and shirt so the nark my philosophical young acquaintance made was t directed at me in a personal way.

"Some of these obese men," she said, "and their rt shorts look dreadful, and a pop-top on a 168-nd weman would not be accepted in most country

"Is a man or woman judged by the clothes they wear?"

"Proper dress is simply appropriate dressing, plus taste and a woman particularly need not be a to fashion. She knows her general type and not choose a dress, shorts, or attitue that looks lead on her just because it is a popular fashion."

She passed for a measure, then went on, "Poople is good taske try not to make themselves conspicuous wearing what they know to be incerrect, or inappitate. As a well-established golf club we are for-ato that we are allowed to wear shorts."

"How about other golf clubs?" someone asked

"Quite a number," she answered, "insist on dresses for the Indies. They do not permit even culottes but re-quest proper skirted outliss."

with men," she went on, "are allowed to wear walking ris, and personally I would cast a vote for this in the ness world. Those long trousers must be a trial in legree hest. Walking aborts, not gym shorts, left from a few pleasant years at the cottage, would be re conglorable."

"Dress for golf should be before anything else, comfortable. Clothing that is too tight, too loose so too short rob you of your comfort and make you self-councious when you should be able to forget about,groun clothers and be at ease to swing away."

Anyone want to buy an oversize bikini slightly worn, three pairs of short shorts, two leotards (pony size) and five T-shirts with plunging necklines?

Trial by jury is to be ended in Kenya This announcement has been made by Jus-tice Minister Tom Mboya, generally regarded as one of the most enlightened and moderate of

of the most enigntened and moderate of ican nationalists.

Trial by jury is an absolutely indispensable requisite of British justice. It is only by g assured that his fate will be decided by a jury of his peers, or equals, that any man can rest assured his freedom will not be dependent

on the whims of a ruling clique.

Britons in Kenya have thus been deprived of ssential justice within weeks of Kenya being

nted a measure of self-rule, Mr. Mboya, though, was completely logical

in his decision in his decision.

In the past trial by jury had been a right extended to Europeans only. One could not expect the nationalists to continue to grant this

cial privilege to whites.

special privilege to whites.

Those basically responsible for depriving Britons of their, birthright in Kenya are the Britons themselves. They failed to do by the native Kenyams as they would be done by. Thus they robbed themselves of one of the most cherland safeguards of the British juddiesl system. They have no just cause for complaint with

Mr. Mboya-but every reason to regre that, in the past, they did not practise what they the past, they did not practise

### Profumo's Successor?

Lords, lunatics and convicted felons all have one thing in common in England. None of them can stand for election to Parliament. This prohibition also applies to Church of England clergy-

Soldiers and prisoners other than convicted felons, however, are eligible. Last year, several career soldiers stood for parliament, partially, at least as a means of getting their dis-charge. The British Army is required to dis-charge any man making an honest effort to be

Whatever the motives, Herbert Stratton will not get quite the same treatment as the soldiers. An inmate of one of Her Majesty's prisons, on a charge of malicious damage, Stratton has an-nounced his intention to try for the Stratford

seat recently vacated by John Profumo.

Stratton will not be discharged from prison just because he is a candidate. He will not even just because he is a candidate. He will not even be allowed out to campaign. An interesting situ-ation might arise, however, if he is elected. How would the British Parliament react to a police escort keeping watch on a member during a sitting?

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

Betty Ingram, one of the Bay of Quinte Country Cinh's topflight woman guifers, is headed for the bes-season of her links career—and she is not satisfied. Says Betty: "The playing good golf. I'm hitting the hall better and I'm scoring better, but it is not good enough."

good enough."

Playing the most consistent golf since she started shifting the little white ball, she is averaging between 80 and 84 but her target for the season is the clusive "sev-

Betty's best score to date is a 77, shot on the Trenton BCAF course, and she shares the Bay of Quinte's women's course record of 80 with Mrs. Doris

If determination and practice pay off, she will crack the seventics this season. "Eve made up by mind to do it—or bust", she told me. And the alim light-weight golder meant what she said.

At the moment she has set her golding guns on the Ontario Ladies' Open being played at the Oshawa Golf Club from August 12th to 16th. Another Quints mem-ber who will be playing in the tournament is Mrs. Irene

And if Betty's determination pays off and she cards a score in the top seventies or thereshouts she stands as excellent chance of finishing near the top with such golf names as Sac Rilton, test year's winner; Mary Janus McCarter, Gall Harrey, Kay Helleur, Shiley Woodley, Pat Autin, Lou Evans, Namey Smith and others.

Betty has compiled her most imposing season record year since she started playing golf. She is a two-s ladies' club champion and this season will play Amo-on for what she hopes will be her third championship.

Another championship feather Betty is seeking is that of the Watertown Open Ladies' Tournament which she won two years ago. The tournament is being played today.

In the International Golf Tournament, Betty reached somewhere near her peak. She qualified and went to the semi-finals where she bowed out to Gall Harvey.

Her best seasonal effort to date was the wim the Kingston City and District Women's champions th a card of \$3.

Score-wise her best was a 78 which captured for her championship of the Peterborough Golf and Country women's field day.

She is making a hobby this year of collecting wo-men's field day tilles. She won the Trenton cham-plonablp with an 83 and took the Kingston Glen Laurence Club's title with an 84.

Incidentally, Betty added the Business Girls' trophy to her season collection this summer.

Menraphile she is concentrating on the Oniario Ladies' Open held for the first time at Oniario ambilion, I believe, is to bring one of the "big one" home to the Ray of Quinte and her feeling of not being astinifed with her play, as good as: it is, is indicative of a determination to land one of golfdom's biggest trophies and champlomably "filab."

The first Ludies Open was held at Burlington in 1927 and has been held every since with the exception of the war years, at various CYGU clubs throughout the province-

The Oshawa course yardage for the ladies is 6,105 yards, consisting of seven par fives, seven par fours and four par threes. Bunkers are few except around the greens. However, many natural hazards, such as trees, large and small, bills and guilles, rough and the Oshawa creek present a challenge to test the skill of the finest golders.

Divorce Solution Possible

Nicholas Mandaluk, Progressive Conserva-tive member of the House of Commons for the riding of Marquette in Mantholas seems to have found a way to unravel the snart which has piled up over 1,100 parliamentary divorces, piled up over 1,100 parliamentary divorces, Mandaluk infroduced a private bill which would provide for the anonintment of a discover-

would provide for the appointment of a divorce commissioner. This man would be an officer of the Senate and that body, acting on his re-commendations, would be empowered with the authority to annul or-dissolve marriages without the necessity of the Commons later approving

auch action.

Arnold Feters, New Democratic Farty member from Timiskaming, supported Mr. Mandsiuk's proposal. It has been Mr. Peters, aided abetted by his party colleague, Frank Howard of Skeene, who has been responsible for the divorce log-jam. The two members have insisted that the Commons hear evidence in each divorce bill, instead of just rubber-stamping them after their

sideration by the Senate.

Mr. Peters and Mr. Howard have contended that the granting of divorces should not be a responsibility of Parliament, but that Newfound-land and Quebec should establish divorce courts,

as the other provinces have done.

Mr. Mandziuk's bill will provide the machin-ery for the proper study of evidence in divorce proceedings, thus eliminating the real objection of Mr. Peters and Mr. Howard to present pro-

This bill, though, does nothing whatever to remedy what many people consider the major flaw in Canada's divorce legislation, which is that flaw in Canada's divorce legislation, where is small for most of the country the only grounds for divorce is adultery. Paradoxically enough, where adultery is continuous and not just a casual incident, it often leads to the person entitled to seek a divorce for this caus deciding against such a measure. The injured and deserted party concludes, not unreasonably, that his or her mate's continued cohabitation with one person of the opposite sex indicates a strong emotional attachment, which probably means that the departed mate would like to dignify that the departed mate would nee to digni-the relationship by marriage. This is often reason enough for the aggrieved party to the marriage to refuse to consider permitting such a thing. He or she thus forces his or his erstwhile partner in marriage to continue living in sin, while the deserted partner lives a life of cellbacy. This often wins the deserter the dis-dain of his or her former associates, while the closested party is enabled to play the role of a saint. Providing, we might add, there is none of John Steinbeck's biologist around. Stein-beck once said that he liked biologists because This often wins the deserter the disthey constitute the only group in society that does not confuse low hormone activity with does not confuse low

morality.

Above the babble of many conflicting opinions and theories about taxation which have opinions and theories about taxation which have been aired before the Carter Royal Commission, one voice is beginning to stand out clearly. It is the voice of various Canadian women's or-

ganisations.

The ladies are unanimously agreed that the Income Tax Act and the Estate Tax Act, singly and in concert; conspire against their sex. One of the examples most frequently citad is the tax

or the examples much recipiently constrained accorded widows' pensions.

Not only is a pension capitalized on the basis of the life expectancy of the recipient and added to the value of the estate, but in the bargain, a payments made are, also, subject to in-

The Canadian Committee on the Status of The Canadian Committee on the Status of Women noted in its brief that when estates total less than \$75,000, it is nearly impossible to find diguid assets that can be set aside for laxes. "The government," it says bluntly, "has no right to frustrate a married couple's expectations of a reasonable and earned security while either

spouse lives."

This is a proposition which fair-minded people will find it exceedingly hard to deny.

No Consolation

Speaking on the eve of the showdown meet-between the Soviet and Chinese branches of the communist camp, Premier Khrushchev re-peated his "softer" line on the question of war.

"The time when war could be carelessly un-leashed is finally over," he said, adding that "he, who begins a war today cannot plunder anyone

uld be burned up in it."

Significantly, however, Khrushchev also re-iterated the boast that communism would conorld, not by war - but through the

class struggle.

Herein, of course, lies a timely reminder for all of the democratic countries of the West. The Sino-Soviet ideological rift is essentially a dispute over the most expeditious means to the end, not a dispute about the end in itself.

he's banking on it!

Most newspaperboys are banking part of their savings for higher education.

Even if you can easily afford to send your boy to college, you might consider this---

the boy who works and saves for part of his education is the boy who will get the most out of college.

He'll appreciate Pop and the checks from home

more if he's already had a taste of a oney by working himself.

And while his route profits are important, this is only one of a number of reasons why so many of today's successful men encourage their boys to get the benefit of Newspaper, Route experience—including service, salesmanship, collections and record keeping.

### Communist Morals

Bishops from the 18 churches of the worldwide Anglican communion have been meeting at London, Ont., prior to the Anglican Congress

to be held in Toronto later this month. Several of these bishops have been interviewed by newspaper reporters.

In one interview, Rt. Rev. R. O. Hall, Anglican bishop of Hong Kong, said a moral reformation in Communist China is providing a challenge to the Christian church there.

Corruption and prostitution have been virtually wiped out "to the best of my knowledge."

Much the same claim used to be made about Soviet Russia in the earlier years fo its revo-

These claims are getting as tiresome as the apology which used to be advanced for Mussolini, that he had made Italian trains run on

It is not a question of doubting the accuracy of the claims for "moral reformation." Rather it is a matter of properly evaluating such achievements and weighing them against the rest of the

In the first place, nobody ought to be sur-prised if dedicated revolutionists prove incor-ruptible. Revolution is not a comfortable trade. ruptible. Revolution is not a comfortable trade. It a man desires the easy life, there are simpler ways of achieving it than by arousing the masses to overthrow a ruling cilque. The communist revolutionist has nothing in common with the soldier of fortune. He may be stupid, cruel and "recognition of the sincers and this sincers and this sincers are completed, as the simple of t disillusionment sets in.

Communism as a political and an economic system provides plenty of scope for corruption later in its development and this can become a pressing problem, as reports from present-day Russia testify. But the revolutionist them-selves are, generally speaking men of rectitude, with a moral standard of their own to which adhere strictly.

Their incorruptibility is an asset—but it no

more justifies con re justifies communism than did Italy's sched-keeping trains justify fascism.

As for the eradication of prostitution in

communist lands, three factors are at work.

Firstly, the opportunity to benefit by prostitution dwindles. Prostitutes' costumers are tution dwindles. Prostitutes' costumers are men of means and men of means become scarce in the early days of a communist revolution. Secondly, the opportunity to make a living by other means increases; communist lands have few unemployed. Thirdly, the communist has always looked on prostitution as an example of the exploitation of the poor by the rich and a communist regime will be much tougher in stamping out prostitution than most other gov-

Later a new type of prostitution may appear,

one who plies the trade for favors or to escape persocution at the hands of the secret police. There is no reason to deny the communists recognition for their achievements in lessening corruption, and prestitution—but human nature being what it is these gains are unlikely to escape seing what it is these gams are unusary tion multiply in a society where so many hold extraordinary powers. As for prostitution, it will always seem an easy way of life to many of those who do not like to work, as witness the widespread tendency in many societies for women of the leisure classes to marry for money, a practice which, as George Bernard Shaw has reminded us, is merely a type of prostitution in a socially acceptable form.

### Sergeant's Mess

Army officers called as character witnesses in the preliminary hearing of an army sergeant, now committed to stand trial for murder were under orders not to testify. An affidavit was produced, in which Defence Minister Hellyer swore such testimony would be prejudicial to national defence

national defence.

The proposition that the character of an individual army sergeant abould be kept secret, for defence purposes, is an interesting one. If the man were a senior officer, or if the question were one- of the characteristics of sergeants in general, there might be some sense before the contraction.

But what explanation could there be for

the attitude that an army sergeant's personal character must be kept secret?

I am not popular. People do not like me. That is my fate.—Herr Franz-Josef Strauss, for-mer West German Defence Minister.

RARE, MEDIUM, WELL-DONE By GEO. H. CARVER, Sports Editor

Student coaches attending the Royal Canadian Legion's autional track and field coaching clinic at Goelph, August 12:28, will heartily approve of latest developments.

Now, not only will they be studying under a care-fully selected team of coaches, but also they will be able to learn by watching a quartet of world calibre athletes de-monstrate proper technique.

Hooding the foursome is Vancouver's Harry Jerome, and for Harry it will be the start of the common that the start of the common that the start of the common that the start of the serious leg injury in the 100-yard final of the British Empire Games at Pertih last December, but he reports 'a well on the mend.

The other three who will be with him at Guelph have equally fascinating reputations. They, are England's Peter Raidon's, who still has a share of the world 220 record. United States' Phil Mulker, six-times decatalon champles and Canada's Dave Sieen, first from this country over the 64-feet shot put harrier.

Announcement that the four will be on hand for dematrations was made by school director Geoffrey Dyson. The extracting delighted to be able to make the announce-ent," said the Legion's sports director.

Dyson also disclosed that Jerome, the only runner to k 92 for 100 yards and 10.0 for the metres, will be of the 340 students as well. He is eager to take up-ching at the end of his competitive career and will m the intricacles of field events at Guelph.

Jaromo ran his 100 metres in the magical 10.0 seconds in the Canadian Olympic Trials in 1846 at leakaton. The great run came shortly after Germany's Armin Hary startled the track world with the tret 18.0.

The sprint whir, who is only 22 years old, ran a pair 2.25 for the 100 yards just about a year back. First in Vascouver on August 25th and the second came in canto on the third of September.

While he's been on an enferced helitar, however, Harry has seen bed; of the times eclipsed by Fordis eclipsed, while he had been bed; and the second by pure in the URAAU champleanshys at \$1.100 pure in the URAAU champleanshys at \$1. Louis and also turned in a wind-ensisted \$5 for 100 matres surfer the year. The latter, of course, is unofficial for re-cord purposes.

Like Jerome, England's Peter Radford will do "double " at Gualph but with a difference. Radford will also a member of the instructional staff, lecturing on sprint-in the "B" or general course.

His listed 220 yard record is 20.5 for the distance round one turn, a mark shared by many runners. The time has been bettered but with wind assistance, and, of course, on 220 yard straight or slight turn courses.

Still a young sthicts, Endford won't be 25 until September. He was an Olympic competitor in 1949, as a junior turned 10.3 for 100 metres and 20.3 250 metres both still world junior standards.

s with Jerone and Radford, there is also an un-story connected with flad man Dave Steen. He's det caching help from brother Don, who'll be a staff or at Goelph. Don, incidentally, has been closely test with the British Columble Legfon's Junior Olym-ralning Plan, a unique Sitasse and track program has attracted about 18,000 youngsters.

Dave, an able performer with shot and discus, came up with his best shot performance in the 'NGAA championships at Albuquerque, NA, earlier this syring. It was a tess of \$1' 11/4", but unfortunately good only for a second place. He delighted Toronto track fans with a Canadian resort & "" toss in June.

The six-time American decathlon champ, Mulker, had world's outstanding performance before C. K. Yang's 22.—which will probably be revised upwards as he exceed the pole wault maximum by going over 16 fast—spring. Two years back, the 18th and 17th of June, I, he accumulated 8,700 points for the 10 events, but unaccumulated 8,709 points for the 10 events, but un-ely, a technicality cost him the world mark, Rafer is 8,683 points.

Mulkey's performance which brought the great score was: 100 meters, 10.7; broad jumps, 7.34 metres (about 24 feet); shet put, 15.23 meters (about 36 feet); high jump, 1.59 metres (about 8° 6°); 400 metres, 15.0; high hardles, 16.5; discus, 47.78 metres (about 18' 3°); pole vanit, 4.29 metres (about 18' 4°); javelin, 67.45 metres (about 22' 33°) and 1,500 metres (46.87.8.)

Many people will consider him a little uched."

Others will argue that he possesses the secret real happiness, contentment with his way of

Hie.

His wife, of course, shares his attitude. If she did not, things would have changed around the Balch household—quite probably for the broken sea far as amicable martial relationships were concerned. But Mrs. Balch wanted exactly the same thing for her 40th wedding anniversary as for her first, a box of checolistes. It is not difficult is gratify wishes of this nature after the same of the control of the same thing for her 40th wedding anniversary as for her first, a box of checolistes. It is not difficult is gratify wishes of this nature after taxes, which apply in the ILS but not in Canada, reduce the take-home winnings from \$38,000 to \$51,000.

Balch, at least, did not settle for a continuation of his normal life without tasting the pleasures which could be bought with his winpleasants which could be longing with in any wings. Right off he rushed out and bought his wife a mink coat—she wears it only to church. He tried fishing in Florida for six weeks and acquired a distate for fish. So he returned to Destroit and his cab—only now he has no need to worry if fares are meagre or if a sudden, emergency arises which requires more than his weekly pay cheque to satisfy. Balch and his wife are much wiser than many

who come into a fortune and then worry them-selves sick trying to keep up with a new set of Joneses and discarding their old friends.

Joneses and discarding their old friends.

Still, though money cannot buy happiness, there are so many other things which it can make available that the reaction of the Balches must be open to question. Contentment with one's lot is all very well, but everybody ought to have some dreams, besides helping grown children and providing for grandefiddren. The Backles, apparently, have no desires which money that the content of the second of the second of the backles of the second of the must be open to question. Contentment with

### Scientists Anticipated

Edmonton Journal

One of the most interesting aspects of scientific inquiry in recent decades has been the discovery that nature in the animal kingdom and man in primitive society have anticpatted modern science.

Birds have been found to as-vigate by the stars. Bate find their way in the dark by sonar (reflected sound). Various anials have been discovered with remarkable organs for setting heat and electricity. Dolphins may have an oral tanguage of Abecient herbal fremedies have proved to be based on the action of druss or antibolics which

Ancient berhal 'remedies have proved to be based on the scilion of drugs or autibotics which science has only recently learned to understand. An invastiga-ed to understand, and invastiga-tion that the science has sometime to the science has the science has been that their science has save them from vanity and pride, which are as likely as tyranny to siller what Albert Einstein called "the holy cuy-lative distinctions".

#### Your family's silent partner

Lying there on the doorstep, it can't speak. Or Move. Or Hear. But open it in your hands and it becomes a living, powerful partner in daily living. In the decisions you make, the opinions you form.

It takes you to the highest chambers of government. It takes you to the bloodiest streets of warring countries. It takes you to the heart of history in the making. In short, it tells you what in the world is happening and why.

But people depend on it for needs beyond the need to know. It's where famflies turn when something's to be bought or sold. It's where hints on health, cooking, religion, amusements, dressmaking, etiquette, marriage are found.

It's where charitles first turn for help, and a place where a letter to the editor is published. It's where campaigns are fought and lost dogs are found. It's where criminals are exposed and newlyweds applauded. Where birth and death meet on the same page.

> It's your newspaper, silent partner of the family, yet one that says so much, does so much for so many people - every day without fail.

RARE, MEDIUM, WELL-DONE By GEO, H. CARVER, Sports Editor

A tip to the golfing ladies of the Bay of Quinte Country

Keep your eye on Betty Ingram come Saturday when you extertain all those nice links gais from other parts of the district.

Betty's golf at the moment is hotter than the south end of a firefly—and there's no signs of it cooling off

Last Saturday Mrs. Ingram went to Watertown to play in the Ladies' Open Tournament of the Watertown Gelf and Country Club—and she won it all.

She shot a seat 75, which I balleve is the best card of her golfing career. This is the second time she has brought beens the Weisriown bacon. She won it two years age with an 89 jun.

Mrs. Ena Corke accompanied Mrs. Ingram and she did come home empty-handed-in the first flight. . She won the putting

And here's a tip to the golfing gentlemen of the Bay of Quinte Country Club.

This tax't your weekend to how! on the fairways. The gais have taken over for the day and they do not went any mere males cluttering up the greens and fairways.

You can play pinochle; push apenny or tiddley-winks within the confines of the club house, but if you don't want that cold glassy stare from the better halves, don't permit yourselves to tee off before the gals take over for their annual Field Day.

Speaking of the field day a woman spokesman of the b said today that Saturday's annual event should nax anything of its nature held here before.

Women golfers are expected here from Islington, White-6, Glen Laurence, Napanee, Trenton RCAF, Picton, Co-urg and other district clubs. They will be shooting for handsome Mead-Johnson Trophy and other fine

The chairman of the games committee and her assist ants as well as those of the house committee have gone al out to make the 1933 Laddiss' Field Day the best in history The draw will be published Friday.

Heanwhile, the Kenmors are resting on their clean sweep over Peterborough laurels awaiting the victors of the Oshawa-Ajax series.

That series prior to last night was stalemated at win each and the third game a tie. The fourth game played Tuesday night."

Oshawa took the measure of the opposition in the second tili 5-3 but Ajax came back to hand the city club a 10-3 shellacking in the third game.

Whichever club wins will give the Kenmors a good for the roses. Both are well proportioned in al sartments and the best-of-seven finals should be protive of some outstanding baseball.

The Lakeshore champlons will likely play down with Brockville Magedomas, which, I understand, have been ring in a New York-Ontario League down thataway.

That, though, begs the question of whether possible is really a profession. It ought to be, in the sense that profession mught to be a man who has undergone some training and who brings to his duties not merely a feeling of responsibility but also a standard of ethics.

For most people who enter politics, though, it is a calling. They are impelled to participate. There is nothing about this fact which is initial early to politics being treated as a profession. But more attacking that it is a little more attacking that it is a littl

not all those who are called will also have trained themselves. The man who is merely trained will always be at an enormous disadvantage when competing with the man who is in politics because he lives and breathes it.

What we need of course, is a greater recognition of politics as a profession, so that those who feel impelled to enter upon a political career receive the proper training when they are young. This is not a state of affairs impossible to achieve. To a large degree, it exists in Britain. There, this attitude had its origin in hereditary responsibility. Men once ruled by right of birth. RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

Beauty versus The Beast tops tonight's professional wrestling program at Memorial Areas. John Paul Heaning, the handsome Florida mat weard, will attempt to pull off the biggest upset of the summer season in the main event.

John Paul will tangle with the shaggy 240-pound lian import, The Beast. Martino Angelo will be on d as usual to direct the battle plan of The Beast.

Those agile ministures of wretilling, headed by the mighty Little Beaver, will put on another of theh highly entertaining midget shows. Beaver will sense with a Mezician buddy, Pancho Lopes against that shaggy-halred villain of the miles, Fuxcy Cupid and his buddy, Pec-Wee James.

Frank Ayerst says most of the topnotch wrestlers are ancut college types whom you'd be delighted to have house guests, fishing companions or co-signers.

But there are exceptions, used as The Beast, a furry 240-pound individual with flowing locks, beard and more pile on his hide than a \$25-yard broadloom. He's a strange case, to say the least. When you first see him you don't know whether to greet him or vacuum him.

Conversationally he's a dud... He would be a complete flop at a cocktall party. When he grunts his manager apologizes for his strange noises.

One thing about The Beast though. He's a pow-erful hombre who has a knack of squeezing people into hour-glass shapes with his bear-bug. This has been largely instrumental in the climb he's made in current wrestling competition.

The Beast's manager and mouthplece is Marteno igelo, who was world junior and lightweight champion ring a long and turbulent wrestling career.

Angelo who is as ready with a phrase as a flying to says he discovered his protege in the mountains of ly while on a world tour.

Villagers told Mariem of a shepherd who was as strong as a bull, could run like a deer, kick like a mule, and carry large animals with ease something after the style of the former world heavyweight champion Primo Carnera. He was practically a one-man menagerie.

On investigation, Angelo found this chap was active a remarkable hunk of muscle, and give or take a sheep, was about as powerful as the legends rated

As far as the midgets go it would be difficult-to I athletes of any dimensions who are more popular h their fans than these pint-size pachyderms.

In a special feature on Friday's program Little Beaver, as was mentioned and his butdy Pancho Loper, are combining against Fury Cupid and Pee-Wes James. They will stage one of their, celebrated specialities, a tag team

They lead a highly colorful existence as their names denote and the enloyment they impart to thousands of delighted admirers. Little Beaver, particularly, is one of the most popular wrestiers ever to perform in a Belleville ring.

However, despite the prominence and prestige which are the lot of these tassing Tlay Time, they d have some treables. The poor kids are politiced to have wooden blocks built up on the pedals of their Cadd

#### Fair Time Again

It is fair time again!
Belleville and district residents are amongst
the lucklest in the province.

the lucklest in the province.

Vacation-time draws inexorably to a close, for them as for the rest of the people of Ontario, but here the impact of this realization is softened every year. For the event which calls the relenge of time to our attention is the opening of the Belleville Fair—which will be on Monday. Before we spend too much time wondering where Before we spend too much time wondering where the summer has gone, we get caught up into the excitement of fair days. And after fair days here, come visits to the "Ex." Right after the CNE closes, school re-opens. And so we are conducted quickly and aimost painteest prom what seemed aimost midsummer into fail. The success of this process depends largely on the late holiday program getting off the mark with a bang. The Belleville Fair sedom

on the late holiday program getting off the mark with a bang. The Belleville Fair seldom disappoints in this regard and this year's pro-gram appears to promise an even "bangler" getaway than usual.

getaway than usual.

For one thing, the Mountles are riding again.
This Musical Ride by the RCMP has been staged here before, but that fact only serves to whet

neer beaute, but may not may serves to when the appetite for a return performance. No-body ever got a surfeit of this marvellous show. Of course, the fair will offer all the usual variety, with something for everyone, from grandma who is most interested in baking—or the midway—to Junior whose attention is for cused on the midway—or the pies. There will be bables and horses and chickens and cows and flowers and schoolwork and sewing and art and a hundred and one other exhibits

And, above all, there will be that carefree day atmosphere which makes one almost glad that cottage days are fleeing fast and sets one looking forward to the urban delights of concerts and lectures and plays and classes which will fill the fall and winter days and alghts until spring sends us all scampering off in search of solitude

So-off to the Fair!

#### Proves Need for a Change

Haste is to be desired in dealing with Hal iks and the SIU. But Prime Minister Lester Pearson is right

in his contention that even more important than prompt action on the Norris report is certainty that whatever action is taken is legal. The temptation to fight fire with fire is al-

ways strong. But for the government of Canada to use illegal tactics to prevent the SIU using illegal tactics would be to compound the damage which this union has done to our democratic

Still, it is disturbing when the federal government has to consider the wishes of provincial administrations in such a matter because pro-perty and civil rights may be involved.

A case could be made out for property rights remaining a matter of provincial jurisdiction, as they were made under the British North America Act. Not only material conditions but also political opinions can differ so widely from prov-ince to province that it would seem wise to

permit a variety of laws concerning property.
Surely, though, in any nation worthy of the
name, civil rights ought to be the same throughname, even rights ought to be the same among out its length and breadth. As Canadians, many of us have been scoffing at the manner in which some States of the Union south of us manage to evade the civil rights portions of the constitution of the U.S. But here in Canada, by our constitution, civil rights fall within the jurisdiction

of the provinces.

Quebec, which is the forefront of the fight equence, which is the forefront of the fight for the preservation and extension of provincial rights, sometimes talks of the advisability of re-vising the constitution. If this is ever done, the federal government should insist, as a minimum price for any connection it more made that the price for any concessions it may make, that it be given full power to make the laws governing civil rights, and to enforce these laws, from the Atlantic to the Pacific, from the U.S. border to the Arctic ice

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Education

It looks from here as if Master Cassius Marcellus Clay, the Louisville Lip, has done plumb talked himself out of becoming what he termed himself, "the youngest Mighter ever to win the world heavyweight championship.

For the man he has dubbed the "egly bear", one Sonny Liston who happens to be the sole owner of the world heavyweight bashle with at least a 18-year lesse on it, has dealt the mouthy young whippersnapper a back-handed lett hook to the jaw of his appraisions

Liston dealt the death-blow when he am-nounced he was arranging to become associated with Madison Square Garden and that means he won't meet Clay until 1966.

The experts say that if Liston does swing over to e Garden is could be one of the most momentous moves boxing history — a move that might begin boosting o Garden back to the big-flight promotional supremecy enjoyed until 1956.

Clay saked for it. Naturally he was di-appointed to mise the opportunity because of Liston's withdrawal from the proposed Septem-ber fight. Sill! he contan't keep his mouth shat. He yelped, "Liston did it because he's seared to death of me."

and Sonny countered that with, "I hope big mouth doesn't fight anybody till I get him next year us the first good man he meets will knock his head

Listen said he was postponing his fight with City until next year because of tax problems. It was reported that total gate, television and other receipts from the Cay fight were expected to be in the vicinity of \$7,000,000. And that sin's

"H I made that September fight," said Liston, "I'd wind up talking to myself while Uncle Sam was countin' my money and takin' it fee taxes and tellin' me about my nice high

The non-shrinking violet from Louisville will keep fossiling until he does meet Liston sext year or in 1989. Meanwhile his gablest is building up the gate. He claims he want's a million and a half as hir sharr and he will probably talk his way into that.

Softball and baseball leams of the city and district in all categories are readying themselves for the im-portant playoffs and playdowns.

Trudeaus and Flyers got away to their start in the OASA Intermediate "A" series Thursday night and the flyboys could wrap up the hest-of-three series at the CNRA park toulght.

The motor boys got away on the wrong foot in the opener according to a story from Treaton, and ticked the ball around in costly fashion. However tonight's another night and they'll havis to be on their best behaviour. The League playoffs between these squads will be resumed later.

Lightfoots Construction and the Bobcats square off for their OASA intermediate AA series in the near

Meanwhile there's a crack peewee base-ball team here that faces the big test at Parkdalo on Sunday when they meet Klugston peewees in the first of a best-of-three OBA playdown

Meanwhile there's a creak power base-hall eash from that force the big test at Parkshile as Sauday when they meet Ringstein percent of programs of the program

RARE, MEDIUM, WELL-DONE By GEO. H. CARVER, Sports Editor

"If you're baseball-minded and looking for a vaca-tion, willing to pass up the World Series for some solid belly-laughs and sheer diamond enjoyment, com-to New York when the L.A. Dodgers meet the Meta."

So says ex-patriate Canadian Harry Jorgenson, now a w Yorker and a baseball fanatic from away back— I too long to mention.

Harry paused in the city over the weekend enroute to a northern hollday resort. "I like holldaying in Canada hut you baseball chaps up here could do a lot sorse than go to the big town and watch Casey's Cutles over the country of t their way through a game or so when the fo

The Polo Grounds is cluttered with the rau The Polo Grounds is cluttered with the confines c titlous population that dwell within the confines c bush. It is mostly the old Ebbet's Field gang, who bed of their ancient creaking edifice have adopted the chated Coogan's Bluff, the former home of the New

"The Meis." Harry said, "are so bad—they are d. Nobody leaves the park until the last out is de. Casey has lost so many games in the ninth mags they are thinking of pelltioning the Commisser to have Pole Grounds games cut to seven hape."

"They fill the air with dropped flyballs, and wild threws and take third strikes for the final out with the tring run on third. They're so need to losing that if and when they do win one, they have the official score-book checked by a firm of public accountants," said

"While the Mets, unlike the old Daify Dodgers have yet to put three men on third, their auties are rem-iniscent of the cavortings of the old Eabet's Field and, fee that the scane guy "Casey" at the helm?" said Harry.

Cases inherited a lot of his own stuff from the Dodgers ald. Anything the Mets do is not new to the million-

Specia headlines, Harry recalled, have been filled with the stories of the losing streak of Roger Craig, the Mets' huriers who dropped eighteen straight before he classed the greenlin last Friday.

So what? The Mets lost 14 of 16 on their last round when they set a record of 22 consecutive road dis before someone handed them a victory.

On one western trip the famous Wilbert "Robbie" Robinson, the Dedgers lost every game until the lest. The prest Darry Vence couldn't come through. But a reskel aid and they wanted to arrange a Bruadway tickerdape reception for him. They would have, too, if Fullonia Pinh Market had been in the theatrical dis-

But Craig should look over the records while be-auling his 18 straight sethacks. Bobo Newsom, a ax warid series hurler who pliched 24 years in the jors, was defeated 28 times on three occasions.

Paul Derringer in 1933 lost 25 for the Reds and the owing year he was set back 21 times.

And remember the Yankees' great Red Ruffing? Before he became the Bomber's are in the 1930's he lost 25 and another 22 games with the Red Soz.

"So," says Casey, "what else is new?"

Tomatoes

"A learned scientist at Rutgers University," reports the Washington Post, "after a fruitful period of research discovered what any salad period of research discovered what condoes, he cater could have told him. 'Most tomatoes,' he reports, 'are tasteless because they're grown for size and looks rather than flavor.'"

The Post owes its editorial writers a holiday in the Quinte district and they have just time

in the Quinte district and they have just time to get their bags packed. Four-bits spent on the Believille market from now until mid-September will give the lie to nonsensical talk about tasteless tomators. Of course, it is easy to understand how a chap down in Washington might make that kind of an error. He has been living a store-boughten of an error. He has been lying a store-loughten life. Even up here, where tomatoes are round and firm and fully packed with the kind of flavor that is adequately described only by the words that are usually reserved for Madison Avenue even up here, we get to think of tomatoes in a disparaging way during the winter months

There is probably no worse buy in the world than a half-dozen cellophane-covered tomatoes have wandered far from their native habitat, which have gone out into the cruel; cold world have been dragged into some store and set down to seduce the memory-laden shopper into the delusion that fall delights can be bought amidst the blight of winter.

In December, and even in May, a tomato is indeed a sad thing. What little layer of red skin it may have succeeded in laying over green flesh lacks any suggestion of warmth. Its heart is as cold and forbidding as its exterior. It is not exactly tasteles but the taste is not of the kind one remembers, certainly not of the kind whose memory induced one to purchase the

Even the first tomatoes to reach the local market from the gardens and fields of sunny Hastings and Prince Edward seem to be shy about denying their kinship with their hothouse

From now on the baskets on the market will From now on the cassets on the market with bulge with a tomato of a different breed. Great, big, red globes, bulging with juice and flesh. That takes care of the Rutger's scientist's size and looks. But these tomatoes just happen to possess ample proportions and tempting ap-pearance. What they have been grown for is flavor. They taste like—well, er, er—they taste like a tomato, that's what they taste like.

And is there a better taste? No matter how you slice 'em, they are good. But you don't have to slice 'em at all, Just sink your teeth in have to allee 'em at all, Just sink your teeth in the skin and tear out a hole. Shake some sail in the depression. Such at the juice, tear at the flesh. More sail. One big guip takes care 'ef the remnants before starting on the next to-mato. For a change you can fry 'em. Not breaded, please! A tonato is the only thing in the world that makes become and eggs take better than bacon and eggs without. A Guinte bound to that is, and it does not go the count to that it. And it does not come the count of the count of the country of the country of the theory of the country of the country of the country of the theory of the country of the country of the country of the theory of the country of the country of the country of the theory of the country of the country of the country of the theory of the country of the country of the country of the country of the theory of the country of the c

Police and coast guard officials in the U.S. and Canada are looking for a fisherman who threw a hammer at a speeding power boat in the Detroit River. The hammer struck a Detroit girl on her knee.

The power boat, one assumes, was travelling too fast and too close to the fisherman's boat, to suit the fisherman. Anyone who has fished in busy waters can appreciate the man's sentiments, if not the reaction.

Other cases of retaliation by fishermen have

occurred, at various times and places. Some-times the retaliation has been, as in this case, unjustifiable and violent.

But incidents occur, and they will do sq as how incidents occur, and they will do sq as long as power boaters are inconsiderate. Good manners, in some cases at least, are more than common courtesy. Sometimes, they are the best means of self-preservation.

# \*Ever kad a Newspaper Route?\*

When a young man applies for a job he really wants—a job with "a future"—he is very apt to be asked, "Have you ever had a newspaper route?" His answer to that question may well decide whe or not he'll get the job.

Why? Because more and more employers are realizing that former newspaperboys already have a solid business background.

They've bought newspapers at wholesale-sold them at retailand operated a business of their own. They've already learned that the only way to conduct a successful business is to give service . . . to keep present customers satisfied . . . and to get new customers.

Many of today's executives were yesterday's newspaperboys. They know that a newspaper route is the one part-time job open to a young Canadian that teaches initiative, the value of money and the importance of getting along with people.

Yes sir . . . there's no doubt about. For jobs with "a future", employers prefer former newspaperboys.

If you have a son that you think might be interested in a newspaper route, why not write or phone us.

# Your family's silent partner

Lying there on the doorstep, it can't speak. Or Move, Or House But open it in your hands and it becomes a living, powerful partner th daily living. In the decisions you make, the opinions you form.

It takes you to the highest chambers of government. It takes you to the bloodlest streets of warring countries. It takes you to the heart of history in the main. ing. In short, it tells you what in the world is happening and why,

But people depend on it for needs beyond the need to know. It's where families turn when something's to be bought or sold. It's where hints on health, cooking, religion, amusements, dressmaking, ctiquette, marriage are found.

It's where charities first turn for help, and a place where a letter to the editor is published. It's where campaigns are fought and lost dogs are found. It's where criminals are exposed and newlyweds applauded. Where birth and death meet on the same page.

> It's your newspaper, silent partner of the family, yet one that says so much, does so much for so many people - every day without fail.

"Tight Money" Again?

Are the Liberals doomed to have the "tight money" tag tied to them, whether they want it or not?

That possibility is raised by the increase the central bank rate from three and a half four per cent.

If any single factor ranked second to the Trans-Canada Pipeline dispute in leading to the downfall of the St. Laurent Government, it was the so-called "light money" policy which had

The Liberals, of course denied the existence The Liberals, of course, dended the catalence of any such policy. Whiteers may have been the whole truth then, it seems clearly evident today that the increase in the bank rate has been forced by developments entirely outside the control of Canadians. The need for the latest change can be traced back to Prestdefar Kennedy's proposal for an "cequilization" tax on foreign securities. Although Canada has been promised exemption from this proposed tax, a drain on our foreign exchange reserves resulted, making necessary some action.

Before we start talking about "tight money,"

Before we start talking about "tight money," though, perhaps we should take a look at the facts, which show that the 3% per cent rate had only been in effect since May and that, at 4 per cent, the rate will be the same as that prevailing from November to May and lower than the 5,5% and 6 per cent rates which were fixed when an aculter foreign exchange crists made our so-called "austerity program" neces-sary. We are thus still better off than we were ary. We are thus still better off than we were a year sgo, and we seemed to survive that period of "light money," or whatever it was, without too much tightening of the belie of our economy. Perhaps, we shall do it again—much depends, this time, on what final decision the U.S. Congress makes with respect to President Kennedy's proposed securities tax and the promised exemp-proposed securities tax and the promised exemp-

In any event, Canada is said to have promised not to use any exemption to build up her foreign exchange holdings at the expense of the U.S. Since a high central bank rate is normally associated with efforts to recoup for-eign exchange losses this promise would seem to offer some assurance that the bank rate will not return to five or six per cent.

# Your newspaper is YOUR SHOPPING GUIDE

In newspapers the news of better products and services is as important to today's modern family as that of current events or features concerning home and family, food and fashion, hobbles and health.

For newspapers are the medium by which most people shop. No other medium supplies the variety and detail of advertising by which one may compare prices and benefits and choose the comforts and coveneinces that make for a full living standard. There's much significance in this for local advertisers. For only in the newspaper can people of all age and income groups and information and inspiration so necessary for good citizenship and for the enjoyment of a

#### Facts on Nuclear Arms

The world has collected its first concrete dividend from the nuclear test ban agreement between the Big Three. Big Three Defence Secretary McNamara of the United States has placed on the record statistics regarding the nuclear armament of the U.S.

It is unlikely that the figures he gave were It is unlikely that the figures he gave were allogether new to his listeners, members of the Senate foreign relations committee and of other interested committees. Under was new was that these figures were not censored out of published lestimony, as had happened in the past.

The general public thus, for the first time, has-had confirmed the authenticity of reports that the U.S. possesses a tremendous "over-killi" nuclear capacity.

The nuclear warheads, tactical and strategic, in the U.S. sociolis are numbered in the tens of

in the U.S. stockplie are numbered in the tens of thousands. Missiles capable of delivering nu-clear bombs to Russian targets number 500.

McMarnar's report will prove comforting to most people in the West. It was, of course, designed to produce precisely this effect. The Defence Secretary, ostensibly, was endeavoring to "sell" the test ban agreement to the Benators. He was also, however, trying to "sell" this agreement to the general public of the U.S., to make certain that there would be no groundswell of public opinion against the treaty, of a type which might induce the Senate to refuse to ratify it. In seeking to win endoration for the treaty, McNamara's argument appeared to fall into two

parts. First he set out to prove how strong the U.S. is today, and to convince the public, as well as the Senators, of this strength he not only quoted figures but also permitted them to be published. It is unlikely that anything he said was news to the Russians. Secondly, he set

published. It is unlikely that anything he said was newn to the Russians. Secondly, he act out to argue that the test ban treaty would enable the U.S. to maintain, for a longer period, the edge it now holds over Russia. If all his arguments are accepted, most people in the West will feel much safer than they have in the past. There may be a few exceptions amongst those who have chanced to read the safe book of the late John Struckey, formst the safe book of the late John Struckey, formst of Warr Struckey, formst of Warr Struckey, and the safe book of the late John Struckey, formst of the late John Struckey, formst of the late John Struckey, formst order per late of the late John Struckey, formst order per late of the late John Struckey, formst order per late of the late John Struckey, formst order per late of the late John Struckey, formst order per late of the late John Struckey. of peace was dependent on both sides possessing an invulnerable "second strike" capacity and on neither side achieving nuclear superiority. What McNamara appears to be saying is that the U.S. possesses superiority. According to Strachey's theory, the most probable result of this would be to panic the Russians into a first-strike.

This conclusion, though, requires a second c. We are here confusing "over-kill" with eriority. The U.S. does not need all the look. We are here confusing "over-kill" with superiority. The U.S. does not need all the warheads It possesses to destroy Russia, and by the same token Russia does not need an equal number of warheads and missiles in order to be able to destroy the U.S.

Readers of Stratchey may find comfort from McNamara that "it is clear that the Soviets do not have anything like the number of missiles necessary to knock out our Minuteman force." That, in itself, assures the U.S. of an invulnerable "second strike" capacity, without even co-sidering its submarine-borne Polaris missiles.

sidering its submarine-borne Folaris missiles. But, for sastly, according to Strachey, Russia must also possess an invulnerable "second-strike" capacity. Otherwise the U.S. might be tempted to strike first, to "pre-empt" any possess such a capacity? Strachey argued that the Russian force's invulnerability was dependent on secroey surrounding the location of the missile bases. This secrey would have been destroyed by the type of or-stell impections the missile bases. This secrey would have been destroyed by the type of or-stell impections that the two to be the secret of 
Straciny's argument, sateguarding the peace of the world.

It would be straiged that except the indicated Russia had from the first committed herself to the "minimum determent" theory, seeking only enough nuclear power to be certain that any "first strike" against her would be serverily pundshed. Confirmation of the view can be read into McNamar's declaration that the Russians do not "appear to have any present plans to acquire (such) capacity" to wipe out the U.S. Ministeman force. In other words, Russia is during the servery of the confirmation of the property to retain the power to retailate against a U.S. "first strike".

The existing situation, despite McNamar's claims for clear U.S. superiorly, appears to meet Strachey's conditions for the preservation of peace—with neither side possessing the ability peace—with neither side possessing the ability. than usual for their constitution to the control of 
peace—with neither side possessing the ability to destroy the other by a "first strike," but with both sides able to wreak havoc on the other by a "second strike."

Question: We've been invited away for so many weekends this away for so many weekends this summer that I've run out of ideas for interesting hosters gifts. More've occationally printed gift suggestions which I've found very helpful. Could you give me a hand with my gift list for the rest of the summer?—Mrs. P. H., Chicago, Ill.
Answer: Personally, I prefer giving things that are not only pretty, but have some useful purpose.

One item most housewives ould use at this point — even bough it seems run-of-the-mill ould use at this point — even sough it seems run-of-the-mill is a spanking new book for telephone numbers and address-es. With all the new digit phone numbers and Zip Codes being handed out, it's neater-to start a new book than to scratch out a new book than to scratch out and decode numbers in the old. The binding may be leather, slik, or brocade — depending on the taste of the hostess and how much you want to spend.

A luggage rack is a less usual gift, but one that comes in very hardy. In addition to its regular purpose, it can also be used in the ruest room for holding extra

handy. In mouseauth purpose, it can also be used in the guest room for bolding extra blankets, on the porch as an extra serving table with the addition of a tray on top, or in the living room to set out the coffee service while guests are busy at the buffet.

Accessories for the guest Accessories for the guest

the buffet. Accessories for the guest room and bath are always appropriate. These might include a set of decorative hangers for the guest closet, or an elegant soap dish in alabastar, silver, crystal or what have you.

How does your daughter grow? With naturall cury hair? If so, we'll cut her hair in a style that will be trim and tantalizing. If not, we'll cut her hair to a perky length and give her a baby soft permanent wave.

No more putting it up every night or after every rain storm. This pian is not only helpful to you, but good for your child. Most little girls are coquettes at heart. We'll wager a child who looks as pretty as she can, will be as smart as she can — and happier—in school.

a month-long visit starting with Moscow's hoad boulevards and ending with the lefty-parks of Kiev, final memory of many Ukrainians emigrating to Can-ads. Between times, strengthening

the tourist's impression of hasic human worth, came Samar-kand, Bukhara and tawny Tashkand, Bukhara and tawny Tash-kent. Here in scorching central Asis emerges a new and be-wildering segment of the Soviet empire here European techni-ques roll back Uibek mud huts and more than 30 nationalities, strayed off the set of some strayed off the set of some Charlle Chan movie, mingle in a racial cocktall whose conse-quemoes are incalculable. And finally lighthearted Len-ingrad with its block-long build-ings and Western affinities, not really seeming a Soviet city at all, viewing the cold war with solomb.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor The Kenmors meet Oskawa in the Lakeshore Base-ball Association finals first game of the best-of-seven series on Salarday—and have to travel to Listle Britain to do it. It is an eight p.m. game and the club loaves here at fire o'clock.

It is definite that the second and third games of the les will be played here Monday and Wednesday nights.

Coach Sid Forster said he will start Bill Latchford, the backbone of his mound corps in the all-important opener. Bill has been an outstanding hurrer all sum-mer and boasts the fine record of nine wins and no

Gordy Vaughn, and Stan Reid will be available as start-ing hurlers, while Larry Soden, who has not done much pitching this summer, on account of his work, will stand by in a reilef role. Then there's Pat Asselstine, who can step into the hurling breach if necessary.

The Kenmors have been hitting at a terrific clip lately, only six strikeouts being registered against them in the last two games. What is more, they have been clouding in the clutches, an all-important factor at any

This Othawa club won't be any pushovers. They swept past the Ajax Merchants, one of the better clubs of the lesgue, with three wins, a loss and a tie. It could be a tight series, one that could very well go the limit.

Regardless of what happens, or which teams wins the league championship, the Kenmors will go on into the OBA senior playdowns, meeting the Brockville Mage-domas in the first round.

Four other clubs of the league also go on to the pro-vincial playdowns playing in various classifications.

The OBA senior series should be a short and sweet one since only live clubs are entered. These include, besides the Kemmors and Brockville, representatives of the Western Counties Baseball Association, Halton County Baseball Association and the Intercounty Baseball Association

I do not exactly agree with the OBA policy of al-lowing teams to select their playdowns classification. In my opinion the winners of association leagues should automatically become the loop's senior representatives. Under the present system a team finishing fourth in the Jeague standing can play in the senior playdowns.

## Dividing the Credit

Elizabeth Taylor's face, it seems, is her tune. Since Miss Taylor's fortune amounts fortune. Since Miss Taylor's fortune amounts, to \$75,00,000 for her performance in Cloopatra, this rates her face at least the equal of that of Relien of Troy, which insumeds a thousand ships. Moreover, there is a supplicion that Relen's repinalization of the second of the second ships of the profile. Those who may object its at Miss Taylor's besultful face is not stuck stop a fence post just have not been keeping up with the news. It seems that body work on Cleopatra, at least in the billiboard version, is not by Taylor but by a model manuel Lofe Bennett. Miss Bennett's not be the second of the s remuneration for a portait pose which spliced her body to Miss Taylor's face was just \$35.

her body to Miss Taylor's face was just \$35.

Specialization is all very well, but this scenario
to be carrying things a little too far. We have
become accustomed to having another voice

A natural gas forced air furnace is so clean so quiet so trouble-free you hardly know it's there

There's no noise, no pumping—just clean, live wareach. It's a pleasant feeling—warmth and comfort throughout your horns ... but from where? Perhaps the entire heating unit is hidden in a closet. Could be ... they're so compact nowadays.

Probably it's down in the basement like most heating units. But because Natural Gas is so clean, so quiet, and so tooble fee, you'll probably forget where the furnace is.

NATURAL GAS HEATS YOUR HOME BETTER FOR LESS Because Natural Gas burns more efficiently than other heating fuel you can heat your home better and faster for less. Natural Gas burns completely—leaves no soot, eliminates the need for fernace cleaning, has free 24 hour service for all equipment.

Start enjoying this low cost way to better heating this Fall. Visit your local Lakeland office today or your natural gas dealer.

A brief rundown on this city's representatives in the OASA Intermediale "AA" playdowns, Lightfoot Construction, seems in line after the easy manner in which the team handled the Bobcats in their elimination series.

Bobcats had len players for the first game and eight the second, which they were forced to forfeit. Except a few who never learned the meaning of the word t, the Tabbies were a and example.

The team executive consists of manager Ron Ruffeets and coaches Leo Lucciola and Harry DeRushle. And while its unofficial, I think that Don Smith who plays centre field and bate cleanup-on the club, had a lot to do with the team's organization and its entering the OASA play-

A four-man pitching staff consists of ace Goorge Young, Gerry Generouser, Harry Fowers and Dave Fowery. Ins Merchan and Don Wood do the catching, Fower, Ins Merchan and Don Wood do the catching, Ree Hell, Jack Garvin and Hich Yeomey with Smith, Back Hell, Jack Garvin and Hich Yeomey has backed on the back of the Fower of the Control of the Control of the back of the Season of the Control of the Control of the Dong Hall is the shoetstop.

## SPORT FLASHBACK" JULY 4, 1956

"Pat Haracle, after three close calls, finally pitched his first no-hit, no-run game of the 1956 Belleville and District Sothall League schedule, a 12-6 victory over Madec last night for Point Anne.

"It was Pat's fifth complete game and victory of the son in which he gave up one hit, three hits, two more chitters and finally his no-hitter last evening.

"Maracle hursed near-perfect ball as his mater pounded out eight his for acron markers in the first inning. Pat retired the first 13 men he faced before walking Nickle in the fifth. An unswitzed double play by Jake Wade crased the reaser. Maracle faced 23 batters in all, striking set 12.

'It was Pat's fourth no-hitter of his career, two coming t nine days apart in 1956 and one last year."

Editor's Note:—Maracle's Intest no-hitter was his perfect game gem, 7-8, over the Bobenia, with 19 strike-out, on July 17, 1962.

Later in July of 1966, Maracle gave up just two hits in 12 innings while his Point Anne mates got five off Ray Judd in a 0-0 exhibition tie played before 830 fans at the CNRA Park. Judd struck out 25 batters and Maracle

CMRA Park Judd struck out 20 batters and Marsiel four.

### Two-Faced

There is, alas, nothing new about the pot calling the kettle black, but the better kind of pots ought to be above that kind of thing.

That is why it is disappointing to read that the Soviet military newspaper Krasnaya Vzesda has accused ruling circles of the United States of taking a two-faced attitude toward the nuclear fest han

This disappointment does not stem from any lack of accuracy in the Russian paper's assessment of U.S. attitudes. That the U.S. is being two-faced is easily proven by reference to any daily newspaper on this continent. In it will be found, at one and the same time, pronouncements hailing the test ban as a step towards a real peace and assurances that the han will not

ments hailing the test han as a step towards a full, "be were or." Lave in the proof has the same mode prevent the U.S. improving and sugmenting its muchar atocopie.

What is disappointing is that the Sorjet hyper should pretend surprise at such a situation. Unless the traditional tendency of the military towards density is even more extreme in the Sorjet Union that one would suppose, Krananya Vareda must know that swort testimony the test ban is virtually meaningless is the conjugate of the conjugate of the conjugate of the u.S. senate can be assured.

The fine measure by the U.S. Senate can be assured.

Purthermore, if the editor of Krananya Vezeda hase even a rudimentary knowledge of the nature of the U.S. nuclear armony—and that of Russia; too-le must know the test ban is raised, which is the conjugate of the nature of the U.S. nuclear armony—and that of Russia; too-le must know the test ban is fine only upper the control of the u.S. senate can be assured.

The time has long passed when it was fine time of Russia; too-le must know be test bent is not in this field, but in proposition of delivery, that research promites the most of the control of the control of the u.S. the control of 
That is what the test ban is all about, an effort by the two super-pospers to prevent the spread of nuclear weapons and, perhape especially, an effort to prevent experiments which would make such weapons so cheap that any would make such weapons so cheap that any such power in the proposition of the provent in the prove

other power, no matter how great.

And this, of course, is precisely why the Chinese Reds are so bitter about the test ban vicesly. If Russia and the U.S. want to get tough—and it is in their own interests to do so—they can use nuclear blackmail to prevent China from acquiring the weapons which would not only make her a member of tha nuclear club, but would also clerate her to the note of a super-power, if she' could discover some cheapments of delivering such nuclear bombs to a target. target.

### Interpretation, Please

China has finally revealed the basic cause of the Sino-Soviet dispute. It rests, apparently, on Russian failure to live up to an agreement to provide China with an atomic bomb. The agreement, reached in 1957, was to have been fulfilled in 1959.

The Russian failure to honor the agreement The Russian failure to honor the agreement with the Chinese though, preents a bit of a quandary for the West. Russia now wants a non-aggression pact with NATO, and continues to ask for it while she stands accused of breaking at least one agreement with China. Should the West take this failure to tultil the agreement with China should the West take this failure to tultil the agreement with China.

the agreement with China as a hopeful sign-

We have an overwhelming need to break with the cardin prejudices. The first is that human mature is incapable of improvement and that the visions of perfection which religious prophets have had are impractical, that attempts to realize them do the human race more harm than good. The second prejudice, which is closely related to the first, is that ideals must be advantaged to the first, is that ideals must be advantaged to the first, is that ideals must be advantaged to the first, is that ideals must be advantaged to the first, is that ideals must be advantaged to the first, is that ideals must be advantaged to the first of the first o persons, it is upon conduct under the guidance of art, of faith, and of wisdom that each of us must depend.—John Net.

When a young man applies for a job he really wants-a job with "a future"-he is very apt to be asked, "Have you ever had a newspaper route?" His answer to that question may well decide whether or not he'll get the job.

Why? Because more and more employers are realizing that former newspaperboys already have a solid business background.

They've bought newspapers at wholesale-sold them at retailand operated a business of their own. They've already learned that the only way to conduct a successful business is to give service . . . to keep present customers satisfied . . . and to get new customers.

Many of today's executives were yesterday's newspaperboys. They know that a newspaper route is the one part-time job open to a young Canadian that teaches initiative, the value of money and the importance of getting along with people.

Yes sir . . . there's no doubt about. For jobs with "a future", \_\_ employers prefer former newspaperboys.

If you have a son that you think might be interested in a newspaper route, why not

# Pinch Hitting

A Canadian Press story out of Toronto the other day says that a group of fans from Toronto's Italian communally offered Marciano just that amount to come out of retirement.

\* \* \* Kennor coach Bid Foreier and his merry men (al-though not on merry after the game), were quite im-pressed with the ball park in Little Britain, where they played the Oshawa Marchanta Inst Saturday night.

Forster says that it was "as nice a bail park as I've n in some time. The infield couldn't have been better the outfield is darn near like a bowling green."

And get this it is reported that the Oshawa club

is charged exactly \$3 per night for the use of the park. That two dellars is far the cost of the power for light two dellars is far the cost of the power for light may be a similar to the cost of the power for light with rain threatening when the Kamoon played there Saturday and yet 350 fans pald their way into the park. For an earlier game there, Othwar drew over 600, girting than a \$470 pats.

Is it any wonder that the Merchantz have transferred no of their games there from Oshawa? If the same portunity presented itself here you can bot the amors would give it a lot of serious thought.

Meanwhile, the Merchants are in town tonight for third game of their Lakeshore finals. Game time \$15 at the Fairgrounds— The series is deadlocked

With Belleville's population listed at 30,000, and a wide rural area to draw from, there should be no reason why tonight's crowd should not at least match that which the Merchants drew in Little Britain. How about it?

And this Oshawa ball team has, and we expert i again, force the Kenmors to a top effort before, and

Johnny Valentine, the United States wrestling champion, will put his title on the line egain here Friday night when he tangles with the wild and woolly createurs, "The Beast," in the main event.

Valentine will have all he can handle and maybe u some when "The Beast" lets loose. Valentine's onent knows nothing of rules and such and once he ers the ring, it's up to the other guy to look out for

The U.S. champ says he has put better men aside without trouble, but to underestimate "The Beast" is like saying you can extinguish an atom bomb with a pail of water. It should be an action-paced bout.

Dr. Jerry Graham returns to test his skills against e Great Hephisto in the second match, while Tommy tools gets the show under way in a battle with Tony

The action is at Memorial Arena and starts at nine o'clock

MONTREAL (P) - Trans-Canada Air Lines said Tuesday Il a satching developmenta in the field of supersonic trans-port, but has made no choices yet. A London newspaper re-port recently said TCA is ex-pected to buy six Concordes, the 1,400-milean-hour jets led developed jointly by Britain and France.

Sea water is a source of hemicals such as magnesium, romine and salt and contains pennyworth of gold in every ,000,000 gallons.

# Your family's silent partner

Lying there on the doorstep, it can't speak. Or Move. Or Hear, But open it in your hands and it becomes a living, powerful partner in daily living. In the decisions you make, the opinions you form.

It takes you to the highest chambers of government. It takes you to the bloodlest streets of warring countries. It takes you to the heart of history in the making. In short, it tells you what in the world is happening and why.

But people depend on it for needs beyond the need to know. It's where families turn when something's to be bought or sold. It's where hints on health, cooking, religion, amusements, dressmaking, etiquette, marriage are found.

It's where charities first turn for help, and a place where a letter to the editor is published. It's where campaigns are fought and lost dogs are found. It's where criminals are exposed and newlyweds applauded. Where birth and death meeton the same page.

> It's your newsprper, silent partner of the family, yet one that says so much, does so much for so many people - every day without fail.

Your Ontario Intelligencer carrier boy WILL keep smiling through heat, cold, wind, rain, snow or come-what-may . . . IF YOU PAY HIM REGULARLY each week when he calls to collect.

Carriers, and their parents report that the most discouraging part of newspaper route work, is the collections. Some people do not seem to realize that carriers must pay their bills on time each week and complete collections are necessary for them to meet their obligation and still make their profit.

Call-backs take more time and time is an important element to an active boy. Won't you please have YOUR 35¢ READY when your carrier calls this Thursday? Your help will be greatly appreciated by him.

Open Letter!

TO MOTHERS OF LITTLE GALS FROM 5 to HIGH SCHOOL AGE...

How does your daughter grow? With naturall cury hair? If so, we'll cut her hair in a style that will be trim and tantalizing. If not, we'll cut her hair to a perky length and give her a baby soft permanent wave.

No more putting it up every night or after every rain storm. This plan is not only helpful to you, but good for your child. Most little girls are coquettes at heart. We'll wager a child who looks as pretity as she can, will be as must as she can— and happler— in school.

then so did their feet! If your youngster's feet are to develop healthfully, they need school shoes that are correctly shaped and properly fitted. It's poor economy to crowd-growing feet into shoes that are outgrown—geven if there is still a "bit more wear" in them. The result can be permanent injury.

Your Savage dealer understands the importance of proper fit. Right now he has his new selection of school and party shoes by Savage, for boys and girls of all ages. All are well-made, of good materials, over correct lasts. They're Samitized-treated too, for lasting hygienic protection. It doesn't pay, ever, to take chances with growing feet. Be sure with Savage—correct for children.

Athletes, managers and coaches and other persons sected with sport, have been credited with many sorable quotes down through the years.

Many of the quotes sown invoga me years.

Many of the quotes are meant to inspire participants on to "greater things," while many more are to build up the gate. After all if Joe Blow says his clob will skin the Tigers this Saturday and make I. M. A. Starr look like a rank matter, the fans will want to come out and watch, unually to see Mr. Starr and his mates ram those threats right back down coach Blow's throat.

uran right back down coach Blow's threat.

The beating world has come up with top "quote" material in the persons of Canthas Clary, the brash yearquier who tells one and all what he is relar to the world heavy-relatic hamp Sonay Fatton. Two Arks for the Paper Flood The U.S. Department of Justice is drowning in a flood of paper.

This flood is of its own making. It has been spending \$1,000 per month for the rental of copying machines and over \$125,000 a year to supply these machines with the paper and other materials needed to produce the mountain under which the Department's 31,724 employees are strangling.

Juries are not always composed of the intellectual elite of a community. Juries are not always composed of the intellectual elite of a community. Juries are not a community and a community and a composition of the cases involving difficult technical and financial matters. If was not intellectual matter, if was not intellectual matter as indicated and a composition of the community of the commun Some of the more urgent aspects of the problem have been detailed in a memo by a senior official of the department. According to the Washington Post, this report to S. A. Andretta, the administrative assistant attorney general, has induced the latter to cancel the rental of several machines and cut back on orders of copying paper.

of copying paper.

We sympathize with Mr. Andretta's intentions, while holding scant hope for the eventual success of his campaign. He enters the lists too late. The rivals against whom he must too late. The rivers against whom he must joust are too numerous. The final outcome cannot be considered in doubt. Sooner or later Mr. Andretta will gasp his last in a sea of paper and will be laid to rest, complete with the ne-cessary coroner's report, death certificate, come-tery plot deed, death notice and obituary.

Mr. Andretta should have remembered Can-ute. Contrary to some misconceptions, that Danish king of England did not attempt to stem the rolling idde but rather demonstrated the im-possibility of any such achievement. The thing possibility of any such achievement. The uning to do with floods is not to endeavor to halt them but to learn to live with them,

There are experts in the land and they may be found in the office of any small newspaper, daily or weekly. The larger metropolitan be found in the orner of any suma newspaper, daily or weekly. The larger metropolitan dailles, we fear, have long since succumbed to the mores of big business and, we suspect, must be facing the same peril that threatened the U.S. Department of Justice—"great strain on filing Department of Justice—"great strain on filing equipment." Smaller newspaper offices, lacking both the money to provide perpetual care for the dead thoughts of yesterday and the energy to conduct properly the mysterious rites associated with titler entombment in carefully indexed caskets, have devised two highly efficient methanologies. equipment." Smaller new ods of dealing with the problem

As always when an insuperable problem has to be solved, the solution depends on a reliance upon the ingenuity of the human mind.

Left unarmed amongst the growing flood of paper, much of it treacherously poured onto their desks by deserters from the ranks who had decked desirs by descriers from the ranks who had decked themselves in the trappings—and the salaries— of public relations officers, the small newspaper-men quickly discovered two diametrically op-

The jury concept, while particularly appealing to the Anglo-Saxoo, was not foreign to Greece or Rome, the civiliations of Anie or that of the Siars.

Democracy and the jury system concept and the party system concept and the party system there are always arequest of referes. As Google Bernard 'Shaw wrote: "The worst cliques are bose which consist of one man." Democracy shows them. men quickly discovered two diametrically op-posed but equally successful styles of defence. One defence consists of opening every en-viope carefully, glancing at its contents to make certain that it is not the one epistie in a thousand which is of any importance and then placing it carefully on the back of the desk for future con-sideration and decision. Thus there is never sideration and decision. Thus there more than one day's work in plain view. As the weeks pass, and the pile grows higher, there may occasionally be some qualms about the sheer size of the mountain, but its very mass is sufficient to quell any dangerous temptation to let thought be followed by action. Finally there comes the day when the whole structure totters Too Informal For 'Times' and collapses, spilling the morning coffee, which drips upon trousers which, for some reason or other, chance to have made their semi-annual und collapses, spilling the morning comes, waters of the collapses and the collapses of the collapses with the collapses of the collapses of the collapses with the collapses of trip to the cleaners only the week before. This is guaranteed to produce a burst of righteous indignation at the outrageous workings of Fate, indigination at the outrageous workings of rate, said ire, combined with the obvious impossibility of sorting out such a mucky mountain of coffee-stained manuscripts, resulting in the whole lot being dumped into the wastebasket and for-

a start can be made at repeating the process.

The second system is somewhat more team per-typing, but nevertheless equally effective. It is not to be seen that the per-typing the second that the per-typing that the per-typing the second that the per-typing that when the per-typing that the per-typing tha

one can rearn to live with that.

The only time the system breaks down is
when the chucker-ways, needing what was discarded, saks the asser-upper whether, by chance,

That way lies madness.

But the story is not a one-sided one by any means, While the kids south of the border have been learning how to score goals our Canadian Lofs have been pay-ing more attention to the game of baseball.

That is the opinion of a number of major league useball secouts apparently, for the bird dogs with their reque books in hand, have been watching their northern gibbors very closely in recent years.

egiblors very closety in recent year.

Already the Canadian-in-the-majors trend is maining lited obvious. According to the latest count there are now seven Canadian ball players in the major leagues—and numerous others who will get a good shot at the hig time in the next year or two.

as too any time in the next year or two.

Some of the better haven one include Peter Wurd
af the Chicago While Sor, and Tim Harkners, who is a
member of that is wooderful organization haven as the
New York Mets. Five others, all pickers, are: Tel

among the Canacks. He has been pickling better than
average shill in the American league for the past
foor or-fire years.

However, look for that percentage to grow in the yours ahead.

### RASSLING"

The grunt and groan boys swing back into the field of battle on the local scene tonight with three fine bouts on tap at Memorial Arena. Fight time is nine o'clock.

Headlining the abow, in a two-of-three main bout, will be the wild creature from the hills of Italy, The Monater, against United States champion Johnny Valentina. This one abould be a blood-and-thunder affair from start to finish.

In the semi-final, The Great Mephisto, another ded gent, I think, tackles Dr. Jerry Graham. Tony ise and Tommy O'Toole open the evening's activities.

Kenmor coach Sid Forster, whose quick-trigger tem-per has hastened his departure from a good number of ball games since the start of the 1952 season, has an equally quick wit.

One of his favorite yarns concerns a certain player, longer with the Kenmor Club, one not exactly re-placed as the best sign exteher on the team.

"This player asks, for time in one of our league es last summer," says Forster, "and motions for me to

"I had no idea what he wanted but I trotted out and he takes a look around to make sure no one cits can hear, leans toword me and whispers 'I been watching and I think I got the signs."

"This sort of shook me up for a minute but I leaned right back at him," continues Sid, "and repliet, whose?

"And the funny part of it is he comes right back, without so much as cracking a smile, 'their's."

"I told him to try the same method and see if he could figure out our own but I don't think he made it before the season ended."

### SPORT FLASHBACK"-NOVEMBER, 1985

Definition of Liberalism

Liberals are deeply in destrict to Canon Heward

### Three Questions for a Governor

This week the governors of the southern states of the U.S. held their annual conference. Governor Orval Faubus of Arkansas asked the parley to skirt controversial issues, in other words to avoid talking about segregation. Governor Ross Barnett of Mississippi dis-

"I think we ought to debate these matters.

I believe in fighting it out," he said.

We agree with Governor Barnett.

We presume, therefore, that Governor Bar-nett will have no objection if we consider his proposal to solve the racial issue by relocating Negroes, distributing them evenly amongst all the States of the Union.

Negroes, discriming intera eventy analogues of the States of the Union.

the same proportion of Negroes, he is prepared to advocate integration.

Unless he can answer all three of these questions, and especially the latter, in the af-firmative, he is merely seeking some method by which the South can continue to flout the spirit of the U.S. constitution.

Keeping with the season, Quinto area sportsmen will have a wide choice of sporting events to wile away their weekend with, sort of a warmup session for the Lahor Day holiday coming up a week from Monday.

First off, up at the Bay of Quinte Country Club, the big annual men's invitational field day is in full progress about now but there's still a long evening of fun and frolic shead.

Many top golfers, from clubs both near and far, are battling for top honors, trophies and the works all day

Once the sun starts to sink, however, the boys' thoughts will turn to good food, a refresher or two and a dance with the pretty little lady. The Quinte club's hospitality rates accound to none, according to golfers who play here to there and back again. Each tournament has gained new friends for the cith over the past number of years—and today's will be no exception.

And watch for those low scores too, when the final ulating is done, for both the bosts and their guests are pushovers when it comes to the serious part of the

Meanwhile, city and area ball teams are seeing plent of action these cool evenings with all sorts of playoffs and playdowns in full swing.

Heading the list here at home tonight is the OASA Senior "B" playdown tilt between Belleville's Joyce Real Estate and the Oahaws Helferings. That game is scheduled for the CNRA Park, at 545 this afternoon and promines to be a dandy.

Either Bilden Healey, master of the strikeoul, or the restly veieran, Pet Marnete, will do the Joyce pitching, find some Otherw team custed the Engly boys last fall, per some otherwise the control of the per some per personnel of the personnel of the personnel of the first spans doubt be in for some surprises, although they are said to have added several top Beaches Fastball League Review Clas season.

The Kennors are extermined to show the Oshawa fams pack the beautiful park, that they did not win the sepenant by socident and figure tonight is the time of it. Game time there is 8.15.

Still on baseball, Cannifton visits Shannonille for an er game in the South Hastings Baseball League finals day afternoon at two O'cheek.

\* \*\* Back to softhall, the district league All-Stars are planning on sweet revenge against the boys in blue when they take on the men of the local umplies' as-sociation at the CNRA Park Sunday evening at six

This is a challenge game, with the umps issuing the challenge and the players quick to accept. A number of well-known "blindmen," such as "Shud" Ethier, Al Kelleher, Mike Whalee, Tom Halme and many, many more; will see action for the officials.

The only question seems to be: who will do the umpiring? "Senator" Harry Rollins may get the call, so we hear. And there are plenty of door prizes for the fars.

Up at the Fairgrounds tonight, the Quinte Riding and ving Club has lined up another fine harness meet, top seellesh from around the area running for prite money the track record.

With only a few meets left before the season runs ont, this would be a good time to take another crack at the parismutual windows, teo, wouldn't it? Maybe you can get your old shirt back, if not a new one. The first heat goes at 8.00 p.m.

The Trenton organization takes over at the Belleville wa Bowling Club today, too, with top rinks battling for Benedict Proctor Trophy. Play will run well into a cvening.

Opps—here are two more local games, one be-tween Barriages and Corbin Lock, in their Commercial softball semi-finals, at Prince Charles School tonight. Game time is £10.

In the other, Belleville Woods-Horlock go back to bekville for the third and deciding game of their OASA venile "A" series.

#### What Children Do Without

Today's younger generation," declared the daily "Chuckle" on The Ontario Intelligencer's front page the other day, "is going to have a real problem trying to find something to tell their ren they had to do without."

There are a pair of sly digs in that brief paragraph. Children are prodded for their in-cessant demands; parents for their never-falling

But there is more here than meets the eye. If one endeavors to solve this future problem for today's children, one suddenly discovers sev-eral things which today's children lack, but which their parents, or at least their grandparents, enjoyed as a birthright.

Today's children have to do without the sonable certainty, which all other generations reasonable certainty, which all other generations enjoyed, that they will have children, and grand-children, that there is a future awaiting them.

While the probable life span of the indi-vidual has been lengthened, the possible life span of the race has shrivelled.

Today's children, too, probably lack the benefit of communication with their parents, and others of the older generation. It has been said, and with some truth, that no generation understands the next. But there was a time when this lack of understanding was the result, in the main, of the shortness of the memory of adults. That is no longer the chief cause.

It is a different world. The adult does not speak the language of the child. Once a father taught his craft to his son, started him on his lifework. Today's parent finds that even his son's homework is beyond him. An equivalent level of education does not provide parity of knowledge. In mathematics some things are taught in today's high schools which yesterday's university graduates never learned.

Above still, today's children lack yardsticks.
Moral and social standards have been changing
so rapidly that there is frequently nothing in
which their parents believe so ardently that they will endeavor to coerce their children into abid ing by these beliefs. This provides children with precious freedom of expression—but it also plies upon their shoulders a responsibility for decisions which thair parents escaped. Today's children have much—but they lack

much too. Some of their gains, some of their lacks, make their lot better than that of their parents. But the entries are not all on the credit side of the ledger. Whether they will be able to restore to their children that of which they have been deprived—an assurance of a future, an easy communication with the past, an accepted and acceptable code by which to all this remains to be seen.

#### No Repeat Performance

The Sons of Freedom Doukhobors are on the

re again.

This year the authorities ought to make up ir minds what to do about these sincere but blesome people long before the cold weather in

Talking about winter-and a B. C. winter at that—while vacation time is still here may seem strange. But these Doukhobors burned their homes last summer, set out on a trek and then got caught by winter living in make-shift eamps under deplorable conditions. This should not be permitted to happen again.

The Doukhobors, of course, do not make things any easier by their strange sense of timing—or mistiming. They sat around in Vancouver or mistiming. They sat around in Vancouver all through the spring and most of the summer before starting off for Mountain Prison, where scores of members of their sect are jailed for various acts of terrorism and arson.

Just because these Doukholors are short-sighted, though, does not provide the authorities with an acceptable excuse for matching them in dawdling and delay. Somshow, these people must be settled and sheltered before full makes their present outdoor accommodations hazardous to their health.

#### Unkindest Out

Thieves there will always be in the world, but one hopes that some day they will be more considerate of their victims. Consider the recent robbery of the Kensington studio of sculptor Sir Charles Wheeler, president of the Royal Academy, for instance.

The thieves stole Sir Charles' gold badge of office, and several gold medals, but they did not touch any of his sculpture. More considerate touch any or ms sculpture. More considerate thieves would have picked up a statue or two during the robbery, if only to save Sir Charles embarrasement while reporting the incident. Taking only the gold was adding insuit to injury.

## Pinch Hitting

Belleville's gift to the weightlifting world, John wis, will be taking part in the World Weightlifting hampionships in Sweden next month after all.

It was feared here a short while ago that Lewis would not be able to make the trip, due to lack of finances. The Canadian Fitness Council amounced that it had papet its weightitting budget on sending Lewis and his mates to the British Empire Games, so the Canadian litters would not be able to attend the World tittless meet.

Then Mr. Maurice Allen, of Quebec City, stepped Mr. Allen is the National Chairman of the Amateur detic Union of Canada.

Allen, who is going to the championships as the untry's manager-coach of weightlifting, organized a gala cial evening in his home area of Quebec City. Weight-ting is a big sport in Quebec.

Ecnough money was raised, through donations, at the affair to send two Canadian lifters. Lewis and Pierre St. Jean of Montreal, were chosen to represent their country, an honor of high standing for both men. lien, who, we understand, works for one of the all

The championships are being held in Stockholm, Sweden, and Lewis will leave Montreal, by plane, on September 5.

Lewis' coath here in Belleville, Ken Carr-Briant, of the Apolo Bar-Bell Club, said he doubts that John will be able to place high in the world meet. "He will give his best and when you consider that he will be facing the best lifters in the world, it is too much to expect him to place near the top.

"However, the big idea in John making the trip is o get him the experience, experience that will do worlds I good for him in such meets in years to come.

"John, all his friends, and of course all of us at the Apolo Club are very proud to have him as a Canadian repre-sentative." Carr-Briant added.

Good luck, Mr. Lewis.

Never neglect the girls-or you will hear about it.

Yours truly received a gentle reminder the other day Belleville has a fine women's softball team, known as Smith Fuel Queens.

The Queens play their home games on Zwick's Island, mustly on Wednesday evenings. They took part in the Quishe District Women's League this year, and are now in the loop semi-finals, against the tongly Middleshen Park tolls. They are at home to the Treston-dender park of the Wednesday and the country of the particular and particular as good turnout of Ins.

The team roster includes: Helen (Reeves) Demille, olyn (Baker) Shepard and Lois (Batchelor) Papke, a sesome that has been playing softball here for some rs. Theye are more or less the "vaterans" of this year's

Other players' are Georgina Way, Sandra Clause, Jeanette MacDonald, Mary Jean Elvins, Jean Hughes, Marjorie Hughes, Linda Batchelor, Pat Way, Mary Ctapp, Diane Trumpour and Kay Snedden.

O. K. girls, do you love me again?

#### SPORT FLASHBACK"-April 27, 1953

"Vernon Goyer, hockey, softball and baseball star, as named Belleville's 'Athlete of the Year' by a panel sportsmen of the city on Saturday afternoon.

The big athlete will be the first to win the handsome new trophy secured for the award, and the ministure that goes with it.

"The trophy, which cost in the neighborhood of \$100, was made possible through the generosity of several protresinded citiens, and will be awarded annishly to the athlete judged best for the year. It is a hom "ne silver bowl, modelled something like the famous \$5\ \text{Cup}, mounted on a flat pedestal, with victory figures: i ing the bowl proper.

"Names of outstanding subletes from nearly all sports extegories played in the city were placed before the panel. These included: Bob Hunter, orthall, Don Burtley, subball and hockey? John Satcheley, subball and Mile Augustedo, golf; Sam Mubblind, hastall and hockey? Lloyd "Red" Derm, bockey; Mary Jane McMarty, tennis, from Sapor, silve booling Feter Jones, subball and hockey; Douglas Hull, hockey and Elwood Wickerson, yetching."

#### Diabolic Invention

If you happen to have any stock in Interpublic Inc., sell it.

That way you will run no danger of winding up a millionaire whom only blind men love.

Interpublic is responsible for something ned Marplan, which is its research affiliate. Marplan is responsible for a gadget called an "eye camera." An eye camera is a sneaky kind of lie detector which will never trouble anyone who walks around with his eyes shut.

Otherwise all the eve camera operator has to do to learn your opinion on anything is to man the shutter.

With an eye camera along, you don't even have to wink at that willowy redhead to find yourself in trouble. All you have to do is look. "Click" goes the eye camera. Ah-ha, your pupils are dilated. That means you are your pupus are mates. Inst means you are showing a positive response. And right after the way your eyeballs shrivelled into pinpoints when you said goodbye to your mother-in-law. Boy, are you in trouble.

Eoy, are you in trouble.

Seems you can even get in trouble seeing things with your mind's eye. The report of Marplan's disbellot schievement says that some poor guines pig revealed he was kidding when he said he preferred an editorial in a business magazine to a magazine of the "playboy" type. Madison Avenue is apparently expected to put this discovery to "good" use. If your eyes swell up like balloons, it will be no use pre-teading you are not going to buy that Montle and optional looper-accept transmission. The saleman will know he has you.

But it is in the fields of domestic encace.

But it is in the fields of domestic engage-nts that the camera is likely to prove most ments that the camera is likely to prove most devastating. Just narrow those pupils a mile too much and you are likely to get a beadrub with the hash. Padro, bedroom and beth will be as fraught with danger as the dining with the worder women have always kiesed with the worder women have always kiesed with the worder women have always and the what it was, premonition. In a way, man will be the beneficiary. The eye camera will not bring him the humilisting information that he ranks well below a heliotrope scarf as a pulse-raiser. But just wait until the first tion is only half of that he exhibited while reaching for a dill pickle!

# Clean, convenient glass but that's not all

Of course, mothers appreciate the convenience of Gerber Of course, momers appreciate the convenience of Gert Strained and Junior Foods in glass. The Wide-Top jars make it easy to spoon out boby's food... the re-usable Quick-Twist caps help preserve freshness of unused portions. But most important to any mather is the quality of the food itself.

A big advantage of Gerber Boby Foods is that they're A big devarage of Serber body rooks in the many of "custom-cooked," Each food is prepared according to its own requirements. Whether flash-cooked or slow-cooked fond some foods must bel, cooking times and temperatures are scientifically controlled to preserve the utmost in nutritive values. "Custom-cooking" also contributes to the exceptionally fine flavours, true-to-nature colours and unusual smoothness of Gerber Baby Foods.

### TWO MAIN BOUTS

Johnny Valentine was a hero in Belleville last Friday night but the shoe will be back on the other foot this week,

Wrestling The Beast in the main bout of last week's card, the blende and rangey Valentine was a fun favorite. Valentine takes on the spoular Gentleman Jim Body in this Friedry's main attraction and you can bet your last dellar that Rady will have the faithful on his side from start to finish.

Hady is a top, scientific wrestler, capable of giving entine a real run for his money—and that U.S. champion-belt.

Another headliner, Dick "Buildeg" Brower appears in the co-feature attraction, also a 2-of-3 falls affair, against the 300-pound Mexican, Mighty Ursus. This should be a dandy.

The Great Mephisto will give newcomer Ox Anderson, a try in the opener,

### PORT FLASHBACK"-April 11, 1953

"The hockey season ended last night for Belleville Junior "B" Black Hawks when they dropped their fourth straight game to Weston Dukes.

"The Dukes, defending provincial champions, jumped into a two-goal first period lead, struck for four more in the second and added the final three, without a reply, in the third. Both Belleville goals came in the middle seasion, off the stick of Pat Gilmour.

"While the Cook-Barretinea were well busten by the Haple Leaf farmhands, it was apparent midway through the Disting series, which preceded this one, that they were take and facing a stemp." The siump, aided by the injury to Son Histored, and the heavy, thumping Dakes, arrived on time."

### Tax Reform Proposal

The Winnipeg Chamber of Commerce has sented to the royal commission on taxation resented to the royal commission on taxation blueprint for tax reform. This, says the thamber, is a "package deal"—one part of the rogram should not be accepted without the est, since the various changes are designed to

plement—and compensate for—one another. Basically, the Chamber wants to shift more of the tax burden onto the shoulders of the consumer. It proposes that this be done by increasing the federal sales tax and widening its scope,

Hon. Walter Gordon, who has just come through a barrage of criticism because he did n the scope of the sales tax slightly, with respect to building materials, may prove gunshy of such a suggestion. It is, however, not wholly

The sales tax is generally considered by ation experts to be a "bad" tax, in that it is no respecter of persons—falling just as heavily on the shoulders of the poor and the wealthy, if they require any given article. Indeed, in no respecter of persons—failing just as heavily on the shoulders of the poor and the wealthy, if they require any given article. Indeed, in the past, a poor man has probably paid a higher propertion of his askey for asies tax than a rich propertion of the sakey for asies tax than a rich propertion of the sakey for asies tax than a rich propertion of their homose on services, which have been largely exemple in many asies tax schemes. The Winnipey Chanther of Commerce proposes that the tax should be broadened to include services as well as goods. This may give it a more equitable appearance. This message is the saler-tax, though, is designed to offset the loss of revenus from a reduction in compression and personal homose reduction in compression and personal homose transport of the personal homose are the personal homose tax of the personal homose are the personal homose with homose above this figure, would be placed at 30 per cent for firms with homose above this figure, would be placed at 30 per cent for all frame.

ced at 30 per cent for all firms.

The obvious result of these changes w be to put more money in the pockets of wealthy individuals and of bigger firms—the increase in the scope of the sales tax would not offset these

What the Winnipeg Chamber seems to have in mind is an effort to increase the ability of Canadians to finance their own economic ex-

panelson.

If this is so, though, it seems strange that
the Chamber would also recommend that Canadians' present exemption from. taxation on
capital gains be wiped out. One of the few
areas in which Canadians have proven willing
to risk their money has been in the purchase of
"permy" mining stocks. The risk of loss is so
great here that one may legitimately wunder
dry up if heavy taxes were imposed on the winners. Though much of this money is wasted on
"moose peatures," it has also financed many
great mines.

This messure, though, would make the

## COMPARING THE BEST

Howe or Mercent? Louis or Dempsoy? Mantle or Ruth? Man 's War or Citation? With or Cobb? You could easily fill this column with the names of greats in the world of sport who are compared to others, nountly of a different ora.

And so goes it while you and your differing buildy take terms at setting them up or dropping them in, dopending on whether you are playing the first 18 holes or that lose but zerver locally 19th.

While such arguments are actually silly in most cases, y are also the satest kind in which you can get mixed Everyone knows that Cobb and Wills will server hold unsertaining content or that Howe and Morean will server y opposite such other in a Stanley Cup final. There-you can't win or lose your argument.

The pastime is not restricted to famous national figures either. We have often heard local city baseball, hockey and softball players compared with "Peeny" Mills, "Genner" Arnott, Freddy Goyer, Daw Whalen, Gilly Goyer, Johnny Bawsen, and others.

Very often these friendly, and sometimes not-so-friendly, arguments occur between men of varying ages, say 20 and 50. To both tino such an argument, be it of serious nature, is just like begging for a punch in the beak. Yet, how many of us can result the temptation to toss in our two and a half cents worth? Not many, I know.

Every once in a while we run across some eldtimer se admits that maybe the athletes of today are at at as good as those of hygone days.

One Redvers Macksmie, a golf pro down Montreal way, who has been around for a good number of years, appears to be one of these rare gentlemen. He has seen and played against many of the golfing greats over the past 40-odd years.

While Mackennie was chatting with a sportswriter re-cently, the talk got around to whether olday's golfers are better than those of some years back. (Like we said earlier, doesn't it always?).

Red told the Gezette's Dink Carroll that he thinks suring stars of today are better shemakers, though tings are easier for them than for their predecessors.

"The rough is shorter and the fariways and greens re better," he said. "They have better equipment—a sis for every shot. But they have great skills and sey're weederful to witch. I tithix anyhe they are ofter now than the stars of 39 and 40 years ago."

Carroll, being one of those newsy (or in it nosey1), rturviters, asked him if he thought fellows like Jack kkaus, Arnold Palmer and Gary Player are any better in Bobby Jones, Walter Hagen and Tommy Armour?

"They store better," he replied, "but if I sees and Hagea and Armour were playing under the same can dittens then as exist index they'd probably core just as well. Who knewer? One thing I do knew is that the to test today it is real killer. Another thing I knew is that there are many, many more good gelfers around that there are many, many more good gelfers around today than there used of he."

Like we said, nobody wins these arguments but they sure do lead to some interesting discussions.

# Off Key

Mayor Angus Campbell of Pembroke and Reeve Mel Swart of Thorold township sang a duet at the Ontario Municipal Association's annual meeting at Kingston Tuesday. The theme of their number was excellent, but they were off key.

off key.

Mayor Campbell said Canadian schools are
turning out a "generation of monaters." If this
were true, it could easily be because children
are being pampered, are being spoiled by "the
frills of education", as he maintained. Fortunately, the product is just not there. The percentage of "monsters" is no more than normal
in communities such as Belleville, and we feel
aux. Pembrukes. If some bleeper communities. sure, Pembroke. If some bigger communities seem to have an unduly high proportion of vic-ious youths, it is almost certainly not the schools which are primarily to blame.

which are primarily to blame.

Mayor Campbell said that these "monsters"

"feel and think that the world owes them a
living." Reers Swart of Thorold apparently
had just some people in mind when he stressed
the beneficial results of requiring welfare reciplents to work for their welfare payments. He
laid down three principles, that no nation can
survive if it pays a large percentage of the work
force to remain life, that any Christian and have mane nation must care for those who cannot care for themselves and that anyone who is able to do so must make a useful contribution to society. 'Add Mayor Campbell's declaration that world owes no one a living" and we have four which will be regarded with general ap-

proval by most of us.

Unfortunately, there is not one of these rules which can be accepted without reserva-

It is no longer wholly true that no nation It is no longer wholly true that no nation can survive if it pays a large percentage of the work force to remain idle. Automation has already made this possible, it were able to fid ounselves of the necessity of using much of our manprower for unproductive detence projects. It will become increasingly easier to maintain an extension of the contract of the programment of the programment of the programment of the programment of the programment. This fact does not be considered in the programment of the p is no general disammament. This fact does not marriely relieve everyone who is able from the duty of making a useful contribution to society— it often renders it impossible for them to do so under the existing economic organization. The world does not own anybody a living, but it owes them the measure of the society of the society.

world does not owe anytony a trang, but to wee them the opportunity to make a living.

Three of our four guiding principles must thus be qualified. What of the fourth? A Christian and humane nation must care for those who cannot care for themselves—if the nation is caapble of doing so. Unfortunately nation is campble of doing so. Unfortunately even in today's world some nations cannot fulfill this obligation. The rule needs to be widened, to burst international boundaries.

If that is done, international aid can become

a complement to armament programs in pro-viding additional jobs, over and above those needed to feed, clothe and house our own people. But this is a sorry makeshift to the real adultion. It is comparable to Thorold township's action in putting welfare recipients to work on snow removal, parks maintenance and other manual labor jobs. Reeve Swart of Thorold does not like such a program. He hopes that if it were adopted by more municipalities it would force-provincial and federal governments to "find more productive uses for this huge work force."

Not that there is anything demeaning about Not that there is anything demeaning about manual labor, if it is necessary. But make-work schemes, where men's muscles are employed at tasks which could be done much faster by machines which their brains can design and build, are humilating.

Unfortunately, our provincial and federal poverments cannot solve this problem as easily as Revre Swart appears to believe. Useful works

as Reere Swart appears to believe. Useful works programs require moors, government money must come from taxes, taxes are already high.

Deviding some method by which every person and the properturity of making a useful contribution to opportunity of making a useful contribution to opportunity of making a useful contribution to opportunity of making as the case. The prevention of nuclear war, it ranks as the most important taak facing our twentieth-century industrialized civilization.

Meanwhile, let us have less talk about "monstern" demanding a living of a world which is world with the opportunity of carning in the properturity of the making the properturity of carning in the properturity of th

New Era in Ontario Politics Six candidates, we presume the full slate, have now been chosen to contest the ridings of Hastings East and Hastings. West in the coming provincial election

We wish them all well, in the sense that we hope all of them are able to campaign unhampered by any personal or political handicape, whether of lack of wealth or health or help. We whether of like or wealth or health or help. We hope they discover a way to make the issues of the campaign, as they see them, emerge crystal clear in their public speeches and private con-versations, and that whether in hall or home they find their listeners attentive and willing to hear all sides of any argument.

Though there is no one issue which domin-Though there is no one issue which dominates the political scene in Ontario today, this election is certain to mark a milestone in the history of the province because, regardless of its results, it marks the beginning of a new era.

That this observation may occasion some surprise is a tribute to the genius of the man whose own political era has just closed. That man, of course, is Legile Miscampbell Frost, a lawyer from Lindsay.

Even in the midst of the heat of an election Even in the midst of the heat of an election campaign, members of all political parties will agree on one thing—that Mr. Frost has de-served well of this province and of its citizens. All will wish him well in his retirement

### Practical Joker

Practical jokes are the lowest form of humor—except puns! But to every rule there is an exception. The exception to this rule is now reported from Vancouver.

reported from Vancouver.

A smartly dressed man met is number of attractive women in coctail bars. To each he handed a certified cheque for \$200. Police started looking for the man when those cheques started showing up in department stores. They found him, but could not charge him with any offence. None of the women could testify they had given him anything in return for the dud cheques. Therefore, there was no intent on cheques. Therefore, there was no intent on the charge of the charge

Providing the young man thinks the joke worth the time he spent explaining things to the police, everybody seems to have fared just as they deserved in this little episode.

By now Sid Forster's Quints crew will be hard at the with Brockville Beavers on the latter's home dis-nd. The game was scheduled to commence at two ook this sitemoon. Kenmors left Belleville this morn-

The Enules will face at least two and postiless series if they are to retain their Provincial Seal mpissable. At least one club from the tough latesty League will be in the hunt this season, after once of several years.

The Belleville-Brockville series is a three-of-five affair a winner must be ready to advance by September 18.

Second game of the set will be played here on the Laber Day heliday, Monday, at the Fairgrounds. Game time is S.15.

The terms will flip for the odd game of the set prior to today's game, so it is unknown at this time whether the third game will be here or in Breck-

The Kenmors are well-known locally so there is little to be said about them. If they can get all, or most of their players out for the Brockville series, and can show a little more spirit and huntle than they have been against Oshawa, they should at least hold their own against the

the permant in a similar situation last year.

According to the Brockville press, the key man in the Beaver lineup is Dave Smith, already known here from his junior hockey days. Smith played with Belleville Junior "B"s during the winter of 1961-62.

Smith is a pitcher, said to be one of the loop's best, and a strong hitter as well. Several weeks ago he was hitting .508 with the Beavers and had been going great on the mound.

A Brockville giory says: . "Dave Smith of the Brock-ville Beavers Baseball Club is an excellent example of versitility in a hall player. Smith pitches, plays infield and outlied and often pinch-bits for the Beavers. He possesses a binning fastball on the rubber and kits the long ball at the pints."

Kenmor cosch Sid Forster, who had Smith out with the Kenmors for a while at the start of the 1962 season, says he was much more impressed by the player's batting than by his pitching, but that was early in the spring of the year.

Smith Is by no means the only player on the Brock-ie club, however. Lefty Johnny Elliott is said to be ther top line pitcher. Team batting averages also leate a strong hitting team.

might fielder Art Pearce owns a 373 average; third baseaus Jack Coughlis is beling at a 371 average; third baseaus Jack Coughlis is beling at a 371 clip and he was the league buttler cown last year. Shortdop Das Baster hil 1400 this season and other who were capable at the plate include Jim Ferest; second base-man Rick Boeff, and exister Britan Ricvoble; Dava Bedard is a sure-glored centre fielder.

Kenmor coach Sid Fortser has made no announcement as to his starting pitcher, but if everything goes well, Bill Latchford and Larry Soden will likely open the games, backed up by Stan Reid, Gordie Vaughn and Pat Asselstine for relief.

Forster, no deubt, would like to have Larry Mave behind the plate, Pete Weston at first, Jack Elliott at second, Pat Assessition at short, Moe Hunter at third and Rick Locke in centre field, between Court Brailey and Duffy Follwell-

Others ready for action include Larry Soule, Glen Clarke, Claude Carr, Chuck Kingston, Wayne Gilroy and Forster himself.
